Annexure - II: Status of 11 kV Feeder Metering effected by Private Discoms in the country (as on 31st March, 2026)	27
Annexure - III: Status of 66 kV/ 33 kV/ 22 kV Feeder Metering in the country (as on 31st March, 2026)	29
Annexure - IV: Status of Metering of Distribution Transformer (DT) in the country (as on 31st March, 2026)	33
Annexure - V: Status of Category- wise Consumer Metering in the country (as on 31st March, 2026)	37

INTRODUCTION

Metering of Feeders, Distribution Transformer (DT) and Consumers is essential for ensuring accurate energy accounting and efficient power management. Feeder & DT metering helps utilities to monitor electricity flow at various distribution points, while consumer metering ensures billing accuracy and reduces power theft. Proper metering at all levels allows for better load forecasting, fault detection, and loss reduction, ultimately contributing to the reliable electricity supply and improvement in financial health of power utilities. It plays a critical role in India's efforts to modernize its power sector and promote transparency and accountability.

As per Section 55 of Electricity Act, 2003, no licensee shall supply electricity, after the expiry of two years from the appointed date, except through installation of a correct meter in accordance with the Central Electricity Authority (Installation and Operation of Meters) Regulations, 2006, as amended from time to time.

The availability of correct metering data is also essential for identifying individual system losses, optimizing the power supply as well as distribution network performance. Data gathered from metering also helps utilities to improve their load forecasting, which helps them in optimizing their power procurement thereby reducing the cost of power supply. Availability of correct metering data also empowers utilities to ensure reliable power supply to consumers by taking remedial measures promptly. Data from the Smart meters/AMR can be used to calculate duration of power supply and interruptions in the supply by evaluating various parameters such as SAIDI & SAIFI at feeder, DT or consumer level. Additionally, metering data enables utilities to make informed decisions regarding system planning and enhancing operational efficiency. Bureau of Energy Efficiency (Manner and Intervals for conduct of Energy Audit in Electricity Distribution Companies) Regulations, 2021 also mandates energy auditing and accounting at various voltage levels of the distribution network for all the distribution utilities, which requires proper metering at feeder, DT and consumer level.

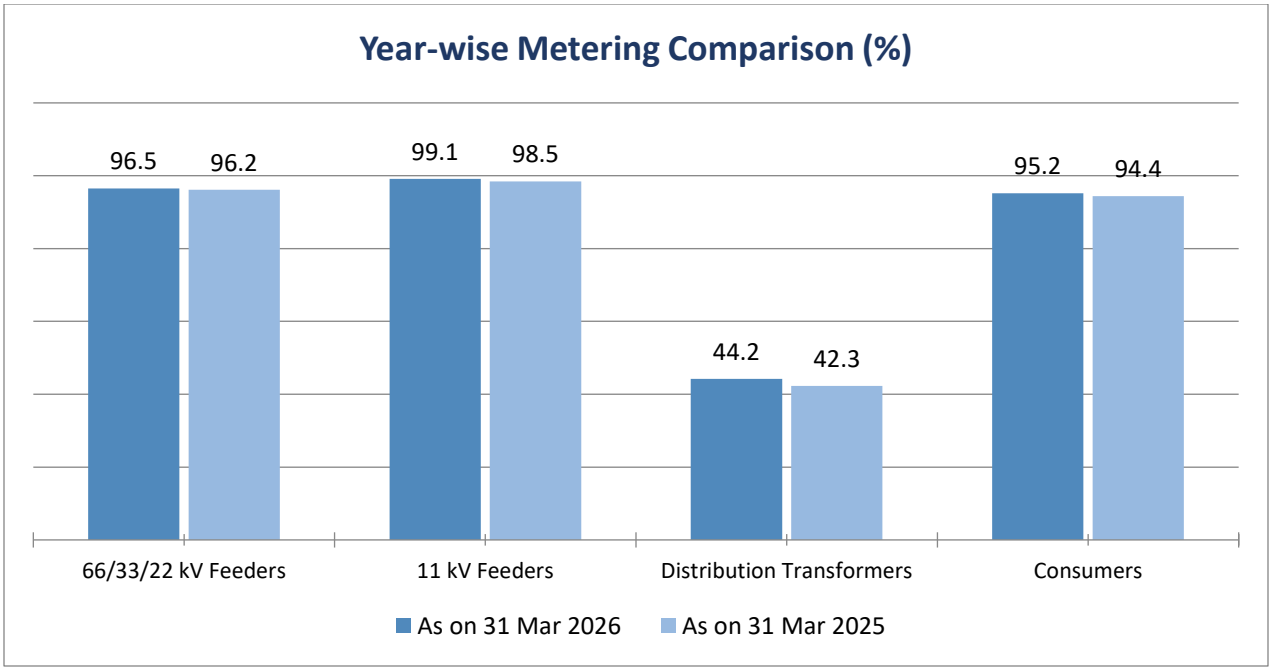
With the objective of reviewing the annual progress of metering activities, Central Electricity Authority (CEA) has been preparing a report on the status of feeder metering, distribution transformer (DT) metering, and consumer metering since 2021. For this purpose, detailed information has been sought from distribution utilities across the country, and the data received has been accordingly compiled. The present Report, highlighting the metering status as on 31st March 2026, has been prepared based on data received from the distribution utilities/states and the National Feeder Monitoring System (NFMS).

A year-wise comparison of metering data as on 31st March 2025 and 31st March 2026 is given below:

Year-wise Comparison of Feeders, DT & Consumer Metering

	As on 31st March 2026			As on 31st March 2025		
	Total Nos.	**Total Metered Nos**	**% Metering**	**Total Nos.**	**Total Metered Nos**	**% Metering**
66 kV/ 33 kV/ 22 kV Feeders	43,724	42,210	**96.54%**	42,985	41,332	**96.15%**
11 kV Feeders	2,66,653	2,64,280	**99.11%**	2,58,927	2,54,937	**98.46%**
Feeders Integrated on NFMS	2,39,609			2,04,866		
DT	1,59,93,898	70,66,933	**44.19%**	1,53,60,382	64,97,931	**42.30%**
Consumers	37,25,22,972	35,44,54,650	**95.15%**	36,69,59,366	34,63,38,217	**94.38%**

A comparative analysis of the overall metering status of the distribution system as on 31st March 2026 and 31st March 2025 indicates continued progress in metering coverage across all levels of the distribution network. Improvements have been observed in the metering of 66 kV/33 kV/22 kV feeders, 11 kV feeders, distribution transformers (DTs), and consumers. In addition, the number of 11 kV feeders integrated with the National Feeder Monitoring System (NFMS) has increased significantly during the year, reflecting enhanced monitoring and digitalization of the distribution network. This improvement can be largely attributed to the implementation of smart metering under the Revamped Distribution Sector Scheme (RDSS), which envisages 100% smart metering of feeders along with their integration with the National Feeder Monitoring System (NFMS), thereby strengthening real-time monitoring, energy accounting, and operational efficiency.



Revamped Distribution Sector Scheme

Government of India, in July 2021, launched the Revamped Distribution Sector Scheme (RDSS) with the objective of improving the quality and reliability of power supply to consumers through a financially sustainable and operationally efficient Distribution Sector in the country. The scheme has an outlay of Rs. 3,03,758 Crore with an estimated Government Budgetary Support (GBS) of Rs. 97,631 Crore. The scheme aims to reduce the Aggregate Technical and Commercial (AT&C) losses to pan-India levels of 12-15% and the Average Cost of Supply and Average Revenue Realized (ACS-ARR) Gap to zero. Under the scheme, financial assistance is being provided to the Distribution Utilities eligible for upgradation of distribution infrastructure & smart metering works. The sunset date of the scheme is 31st March, 2028.

Under the Scheme, 19.79 Crore consumer meters, 52.53 lakhs DT communicable meters and 2.05 lakh communicable feeder meters have been sanctioned with total sanctioned cost of Rs 1.31 lakh crores upto 31st March,2026.

Prepaid Smart Metering is one of the critical interventions envisaged under RDSS to improve the AT&C losses. It allows the Distribution Utilities to timely collect the revenues and measure energy flows at all levels, without any human interference. Proper and accurate energy accounting is the key to identification of high loss and theft prone areas, which will improve the billing and collection efficiencies of the utilities significantly. Reduction of Aggregate Technical & Commercial (AT&C) losses will improve the financial health of the utilities, to enable them maintain the system in a better manner and optimize power purchase as per requirement.

State/UT-wise Smart Metering works Sanctioned under RDSS as on 31st March,2026

State/UTs	Consumer Meters sanctioned under RDSS (Nos.)	Distribution Transformer Meters sanctioned under RDSS (Nos.)	Feeder Meters sanctioned under RDSS (Nos.)
A&N Islands	83,573	1,148	114

Uttarakhand	1,587,870	59,212	2,602
West Bengal	20,717,969	305,419	11,874
RDSS-Total:	**197,924,901**	**5,252,692**	**2,05,704**

Under the Revamped Distribution Sector Scheme (RDSS), the National Feeder Monitoring System (NFMS) has been launched to monitor 11 kV feeders, focusing on parameters such as hours of supply and outages through seamless Machine-to-Machine (M2M) automatic data flow. Essentially, NFMS functions as a monitoring dashboard for collecting real-time data from communicable feeder meters. This enables distribution utilities to track the performance of their distribution network and identify areas requiring improvement. While the NFMS dashboard does not directly address AT&C losses or improve the quality and efficiency of power supply, it serves as a crucial monitoring tool, allowing utilities and State Governments/UTs to take informed and timely corrective measures.

****

STATUS OF FEEDER METERING

STATUS OF TOTAL 11 KV FEEDER METERING

There are about 2.67 Lakh feeders in the country, out of which 74,928 (28.10%) feeders are Urban feeders and 1,91,725 (71.90%) feeders are Rural feeder (including Agricultural & Mixed Feeders) in the country as on 31st March 2026. The total no of feeders registered on National Feeder Monitoring System (NFMS) are 2,39,609 (89.86%). The details of feeders are as shown in the table below:

	Total Number of Feeders	No of Metered Feeders	% of Metered Feeder	No of feeders registered on NFMS	% of Feeders registered on NFMS
Urban Feeders	74,928 (28.10%)	74,316	99.18%	2,39,609	89.86%
Rural Feeders	1,91,725 (71.90%)	1,89,725	99.08%		
Total	**2,66,653 (100%)**	**2,64,280**	**99.11%**	**2,39,609**	**89.86%**

The Discom-wise detailed status of metering is at Annexure-I.

A comparative analysis of the 11 kV feeder metering status as on 31st March 2026 and 31st March 2025 indicates an overall improvement in the distribution network. The total number of feeders, metered feeders, and feeders registered on NFMS have increased during the year, reflecting enhanced monitoring and metering coverage across distribution utilities.

	As on 31st March 2026					As on 31st March 2025				
	Total Number of Feeders	No of Metered Feeders	% of Metered Feeder	No of feeders registered on NFMS	% of Feeders registered on NFMS	Total Number of Feeders	No of Metered Feeders	% of Metered Feeder	No of feeders registered on NFMS	% of Feeders registered on NFMS
Urban Feeders	74,928	74,316	99.18%	2,39,609	89.86%	73,112	72,402	99.03%	2,04,866	79.12%

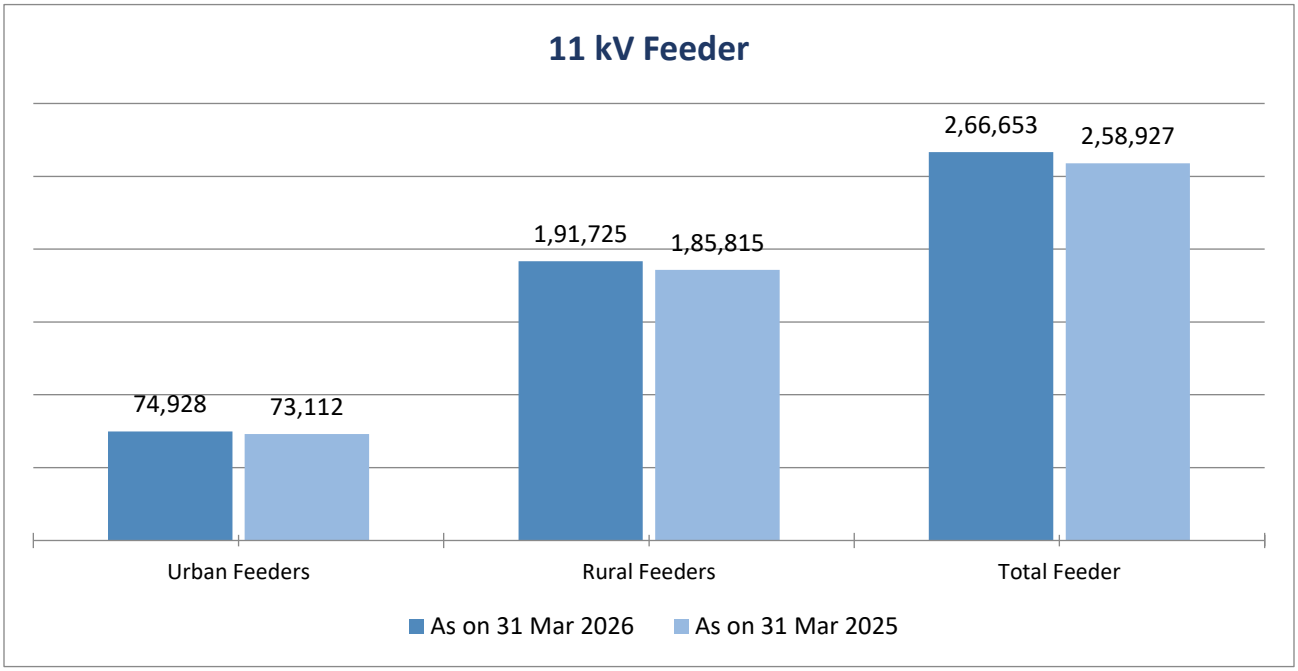
Comparative Status of Urban, Rural and Total 11 kV Feeders as on 31st March 2025 and 31st March 2026



DETAILS OF METERING OF 11 KV FEEDERS EFFECTED BY PRIVATE UTILITIES

A comprehensive analysis of the feeder metering status has been undertaken to assess the progress achieved by both government and private distribution utilities across the country. The assessment aims to evaluate the level of metering implementation, identify existing gaps, and measure improvements over time. Both urban and rural feeders have been analyzed separately to capture variations in implementation performance between government and private utilities, as shown below.

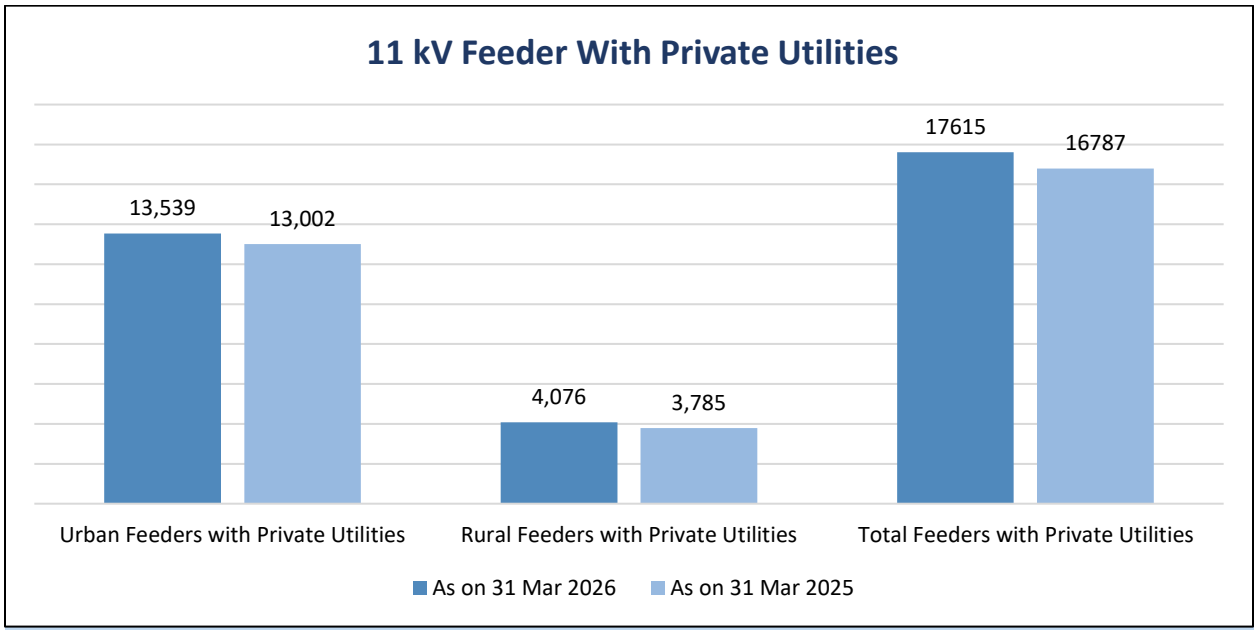
	Total number of Feeders	No of Metered Feeders	%age of Metered Feeders
Total Urban Feeders	**74,928**	**74,316**	**99.18%**
Urban Feeders with Private Utilities	13,539	13,539	100.00%
Urban Feeders with Govt. Utilities	61,389	60,777	99.00%
Total Rural Feeders	**1,91,725**	**1,89,964**	**99.08%**
Rural Feeders with Private Utilities	4,076	4,054	99.46%
Rural Feeders with Govt. Utilities	1,87,649	1,85,910	99.07%

The Discom-wise detailed status of metering effected by Private utilities is at Annexure-II.

A comparative analysis of the metering status of 11 kV urban and rural feeders under Government and Private Utilities as on 31st March 2026 and 31st March 2025 indicates an overall improvement in feeder metering coverage as shown below.

Comparison of Metered Urban and Rural 11 kV Feeders under Government and Private Utilities as on 31st March 2025 and 31st March 2026

	As on 31st March 2026			As on 31st March 2025		
	Total number of Feeders	No of Metered Feeders	%age of Metered Feeders	Total number of Feeders	No of Metered Feeders	%age of Metered Feeders
Total Urban Feeders	**74,928**	**74,316**	**99.18%**	**73,112**	**72,402**	**99.03%**
Urban Feeders with Private Utilities	13,539	13,539	100.00%	13,002	12,907	99.27%
Urban Feeders with Govt. Utilities	61,389	60,777	99.00%	60,110	59,495	98.98%
Total Rural Feeders	**1,91,725**	**1,89,964**	**99.08%**	**1,85,815**	**1,82,535**	**98.23%**
Rural Feeders with Private Utilities	4,076	4,054	99.46%	3,785	3,636	96.06%
Rural Feeders with Govt. Utilities	1,87,649	1,85,910	99.07%	1,82,030	1,78,899	98.28%



To ensure comprehensive monitoring of all 11 kV distribution feeders, National Feeder Monitoring System (NFMS) has been developed with the objective of establishing a

centralized IT platform that monitors the reliability and quality of power across the country's distribution feeders. This is being achieved through machine-to-machine integration, both in batch and real-time, with various feeder monitoring systems deployed at the DISCOM level. Overall, the NFMS leverages advanced monitoring, reporting, and data analytics capabilities to assist in enhancing the reliability, quality, and operational efficiency of the power distribution system. Its implementation will benefit both DISCOMs and consumers by ensuring a more robust and effective power supply metering system. The State-wise details of metering for 11kV feeders are provided below.

S. No	Region	States	% Feeders Metered

		Total:	**99.11**

Under RDSS, existing non-communicable feeder meters shall be replaced with communicable meters and integrated with AMI. Further, all feeders shall be integrated

with the National Feeder Monitoring System (NFMS). A total of 2.05 lacs Smart feeder meters have been sanctioned under RDSS up to 31st March,2026.

DETAILS OF 66 kV/ 33 kV/ 22 kV FEEDERS METERING

There are 43,724 nos. of 66 kV/33 kV/22 kV feeders in the country and out of which 96.54% feeders (42,210 Nos.) are metered. **The Discom-wise/ State-wise Metering status of 66 kV/33 kV/22 kV feeders is at Annexure- III.**

Total No. of 66 kV/33 kV/22 kV Feeders	Total No. of 66 kV/33 kV/22 kV Metered Feeders	% Metered Feeders
43,724	42,210	96.54%

A comparative analysis of the metering status of 66 kV/33 kV/22 kV feeders as on 31st March 2026 and 31st March 2025 indicates an overall improvement in metering coverage across distribution utilities. The total number of feeders and metered feeders has increased during the year, resulting in a rise in the percentage of metered feeders from 96.15% to 96.54%, reflecting continued efforts towards achieving comprehensive feeder metering

As on 31st March 2026			As on 31st March 2025

****

STATUS OF DISTRIBUTION TRANSFORMER (DT) METERING

Metering of Distribution Transformers is essential for accurate energy auditing and accounting of the energy flowing from feeders to consumers. The RDSS scheme envisages metering of Distribution Transformers with communicable AMI/AMR meters. However, as per the RDSS notification, due to the scattered nature of agricultural connections, their remoteness from habitations, and their proposed solarization under the KUSUM scheme, smart meters are not required to be installed for agricultural connections. Further, the RDSS guidelines state that all Distribution Transformers (except those feeding only agricultural consumers), HVDS transformers with capacities up to 25 kVA, and other Distribution Transformers with capacities less than 25 kVA, shall be metered with communicable AMI/AMR meters. Consequently, the metering status of DTs in rural areas remains relatively low. Further, metering of segregated agricultural feeders is undertaken by DISCOMs to estimate the energy consumption in agricultural feeders.

According to data collected from distribution utilities, there are approximately 1.59 Crore Distribution Transformers (DTs) in the country. Among these, 24.35 lakhs DTs (15.22%) are serving in urban areas, while around 135.59 lakhs DTs (84.78%) are serving in rural areas. The distribution of DTs between urban and rural areas and the status of metering is as follows:

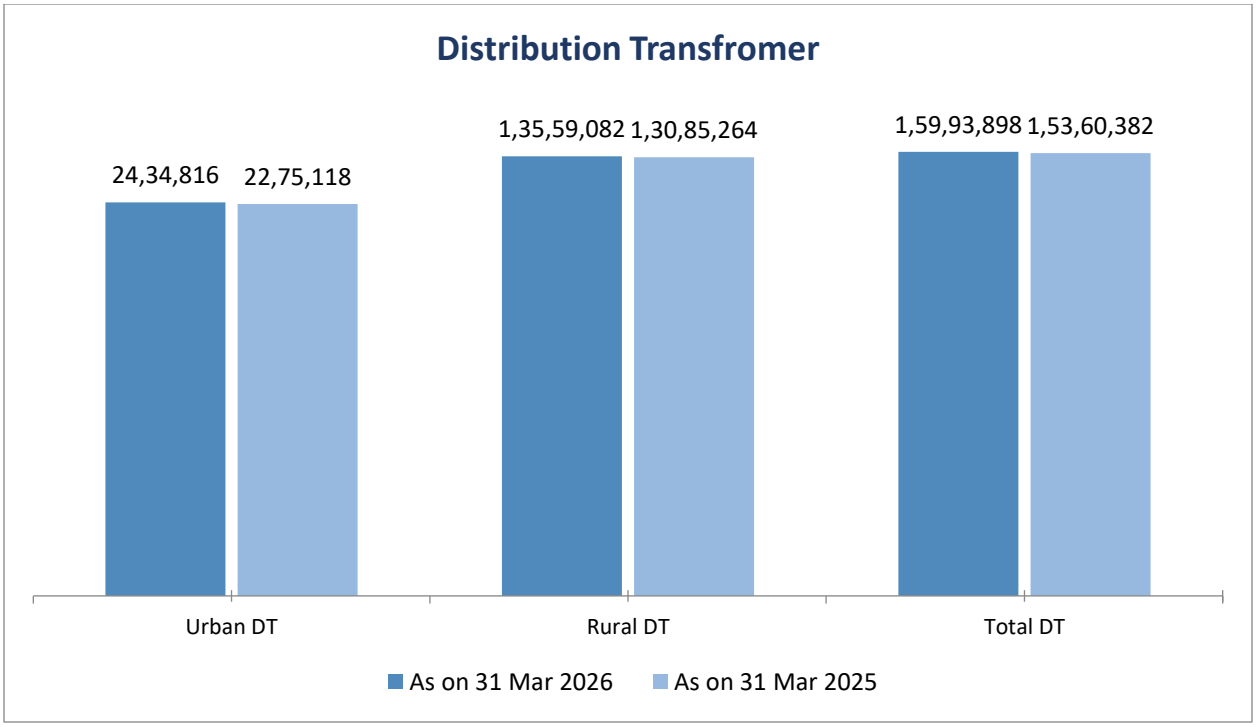
	Total Number of DTs	Metered	% of Metered DTs
Urban	24,34,816	14,57,818	59.87%
Rural	1,35,59,082	56,09,115	41.37%
Total:	**1,59,93,898**	**70,66,933**	**44.19%**

The Discom-wise detailed status of metering at DT level is at Annexure-IV.

A comparative analysis of the DTs metering status as on 31st March 2026 and 31st March 2025 indicates an overall improvement in DT metering across the country. The total number of DTs, metered DTs, and the percentage of metered DTs have increased in both urban and rural areas, reflecting continued efforts by distribution utilities towards strengthening distribution network monitoring.

	As on 31st March 2026			As on 31st March 2025		
	Total Number of DTs	Metered	% of Metered DTs	Total Number of DTs	Metered	% of Metered DTs
Urban	24,34,816	14,57,818	59.87%	22,75,118	13,38,006	58.81%
Rural	1,35,59,082	56,09,115	41.37%	1,30,85,264	51,59,925	39.43%
Total:	**1,59,93,898**	**70,66,933**	**44.19%**	**1,53,60,382**	**64,97,931**	**42.30%**

Comparative Status of Urban, Rural and Total DTs as on 31st March 2025 and 31st March 2026.



The State-wise detailed status of Metering at DT level is shown below:

S. No.	Region	State	% DT Metering
1	Northern Region	Haryana	60.33
2		Himachal Pradesh	98.93
3		Punjab	10.79
4		Rajasthan	57.44
5		Uttar Pradesh	24.35
6		Uttarakhand	35.88
7		Delhi	100.00
8		Chandigarh	100.00
9		Jammu & Kashmir	18.51
10		Ladakh	9.89

S. No.	Region	State	% DT Metering
11	Western Region	Chhattisgarh	100.00
12		Gujarat	82.54
13		Madhya Pradesh	32.55
14		Maharashtra	35.23
15		Goa	100.00
16		UT of DNH & Daman & Diu	100.00
17	Southern Region	Andhra Pradesh	29.22
18		Telangana	39.45
19		Karnataka	35.25
20		Tamil Nadu	19.92
21		Kerala	99.69
22		Lakshadweep	36.36
23		Puducherry	48.46
24		Andaman & Nicobar	0.00
25	Eastern Region	West Bengal	22.99
26		Sikkim	26.31
27		Bihar	74.30
28		Jharkhand	60.99
29		Odisha	16.94
30	North Eastern Region	Arunachal Pradesh	11.26
31		Assam	27.80
32		Manipur	74.12
33		Meghalaya	74.37
34		Mizoram	100.00
35		Nagaland	38.54
36		Tripura	52.44
		Total:	**44.19**

It is indeed worth noting that the overall percentage of metering of Distribution Transformers (DTs) in the country is low. However, there have been some positive performances by state utilities in the past year, with DT metering percentages exceeding 80% in states like Delhi, Kerala, Chhattisgarh, Goa etc. These states have made commendable efforts in ensuring a high level of DT metering.

On the other hand, there are certain states that require additional focus and efforts to improve DT metering. States such as Jammu & Kashmir, Odisha, Punjab, West Bengal etc. have DT metering percentages below 25%. It is crucial for these states to prioritize and dedicate resources to improve their metering infrastructure.

Under the RDSS Scheme, 52.53 lakhs DT communicable meters have been sanctioned as of 31st March, 2026.

****

STATUS OF CONSUMER METERING

As per the data made available by the various distribution utilities, there are about 37.25 crore consumers in the country, out of which about 35.44 crore (95.15%) consumers are metered.

It is noted that about 80% of consumers are domestic consumers followed by commercial consumers (9%), industrial (1.17%) and agriculture consumers (8.56%) in the country. The number of urban consumers is about 14.92 crores (40.00%) and that of rural consumers is 22.32 crores (60.00%). The category wise details of consumers with metering status is given below:

	Urban		Rural		Total		
	Total	Metered	Total	Metered	Total	Metered	% Metered
Domestic	12,13,16,491	11,94,16,710	17,36,59,059	16,87,99,082	**29,49,75,550 (79.18%)**	**28,82,15,792**	**97.71**

The Discom-wise status of Consumer Metering is at Annexure-V.

A comparative analysis of the consumer category-wise metering status as on 31st March 2026 and 31st March 2025 indicates an overall improvement in consumer metering across all categories. The total number of consumers increased from 36.70 crore to 37.25 crore, while the number of metered consumers increased from 34.63 crore (94.38%) to 35.45 crore (95.15%).

	As on 31st March 2026			As on 31st March 2025
