Boiler Drum lifted on 23.02.11. HT completed on 28.01.12. Explosive Approval obtained on 22.01.13 BLU completed on 06.03.13. SBO completed. Unit synchronized on 04.09.13. Full load achieved on 10.04.14</div> <div>• <b>TG:</b> TG erection started in 11/11and TG box-up completed in 07/12</div> <div>• <b>Unit-2 Boiler:</b><br/>Boiler erection started in 11/10 and drum lifted in 04/11. HT completed in 10/12. BLU completed in 09/14 and steam blowing completed in 10/14. Delay due to supply of boiler material &amp; CHP material by M/s Cethar Vessels Ltd.and delay in getting of startup power. Delay due to agitation by the villagers at project site.</div> <div>BLU delayed due to problem in main steam valve. The main steam valve was replaced with another new valve on 22.02.13.</div> <div>• <b>TG:</b> erection started in 11/11and TG boxed-up 09/14 and barring gear in 10/14.</div> <div><b>BoPs:</b><br/><div>• <b>Chimney:</b> Flue can erection completed.</div><div>• <b>CHP:</b> Under progress.</div><div>• <b>AHP:</b> Under progress.</div><div>• <b>CW System:</b> Under progress.</div></div> <div><b>Latest Status:</b> Unit Synchronized on 04.09.13. Unit was under shutdown for attending various commissioning problems. On 28.02.14 M/s. Cethar Ltd again send a drawing for modification of the oil gun guide with lug support. The burner problem remains unsolved. The basic reason is that the burners are not supporting properly. As Full load /COD has not been achieved within six months of synchronization as per the regulations of Electricity Act-2003, now they have to get permission from CERC for connectivity and after which WRLDC will give permission for re-synchronization. CERC has given the permission to injection of infirm power to the Grid upto 11.04.14 vide their order dated 14.03.14. V V L has submitted the CERC order to WRLDC for permission to inject the infirm power to the grid on 18.03.14 and got the permission from WRLDC on 20.03.14. Now V V L is trying themselves for completing balance work as Cethar Ltd. is not cooperating.</div> |  |

| Critical issues   |                                        | The issue E Visa to the SEPCO/OEMs persons is an issue and has delayed the activities like back charging, TG box up commissioning activities of critical equipment. CEA recommended to MOC for allotting 50,000 MT of coal. Project Authorities requested CEA for another 1,00,000 Tonnes of coal.                                                                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                                                                                       |                        |       |                        |                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |
| Reasons for Delay |                                        | Collapse of Chimney, Project was delayed due to non-availability of consent to operation from the state Government. The first unit is already commissioned and COD conducted. There is no commercial interest for the Developer to commission the second unit as PPA is only for 300 MW out of plant capacity of 600 MW. However merchant sale/ short term sale can be effected for which the Dharamjaygarh link is to be made available. (2 Towers are stuck up for forest clearance) – The line is now projected for completion in Oct.’15. Accordingly, 2nd unit commissioning in Nov./ Dec.’15. |                                                                                                                                                                                                                                                                                                                       |                        |       |                        |                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| Critical issues   | No Coal Linkage and no PPA and no Power Evacuation Corridor to Northern Region and Southern Region. Talabira is the linked mine for unit-1 which is IN operational. Geneshpur coal mine has been allocated for Unit-2 which is expected to produce coal from April.,18 till that time tapering coal linkage is required ( 2.5 years). Coal Linkage is awaited. PPA for balance 65% power is yet to be signed (due to non-availability of Coal Block/Coal Linkage, unable to participate in Case-I Bidding. CEA is requested to expedite with MOC for allocation of coal linkage on priority. |                                                                                                                                                                                                                  |               |                        |       |                        |                              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |  |

BHEL have now supplied new GT in place of that GT.</li><li><b>GT-1:</b> Supply of GT was received at site on 10.7.11. GT erection started in 09/11. The work on Blk-I was on hold due to supply of damaged compressor rotor of GT-1. Replacement of damaged stator vanes has completed. Now GT has boxed up. <b>GT FSNL achieved on 09.10.13.</b> GT synchronized on 10.10.13. IBH header rectification work completed on 03.12.13.</li><li><b>HRSG-1:</b> Erection started on 24.11.09. HT completed in 11/11. Re-hydro test completed on 15.8.13. <b>ABO completed on 11/12.10.13.</b>SBO started on 15.10.13 but stopped due to IBH header failure on 18.10.13. Now after rectification of IBH header <b>SBO restarted on 10.12.13 and completed on 13.12.13. Normalization completed by end 12/13.</b></li><li><b>ST-I:</b> Supply of HP-IP &amp; LPT turbine received at site. Erection started on 22.10.11. ST box up already achieved. Oil flushing completed. TG is on Barring Gear. GRP pipeline rectification work started on 03.12.13 and completed on 15.01.14. Steam Dumping completed on 20.01.14. <b>ST synch. achieved on 01.02.14. Combined cycle commissioning achieved on 5.2.14.</b></li><li>There is no provision of by pass stack hence GTs can not run in open cycle.</li></ul> <b>Block-II:</b> <ul style="list-style-type: none"><li>GT-2 turning gear operation achieved on 01.03.13. Cranking done on 3.3.13. FSNL achieved on 06.03.13. Synchronization achieved on 13.03.13. ST synchronization achieved on 26.03.13. Combined cycle commissioning achieved on 27 03.13 (Base load of 338MW).</li></ul> <b>BoPs:</b> <ul style="list-style-type: none"><li><b>Though there was lot of delay in completion of most of the BoPs by BHEL and their sub-vendors. Now all the BoPs are ready.</b></li></ul> |  |

Delay in placement of order for BoPs by BHEL.Delay in readiness of BoPs by BHEL/Sub-vendors.Shortage of manpower by BHEL/sub-vendors. During the execution of the project criticalities such as completion of water system, RHS Milling system, AHP&CHP. There was delay in placement of order for BOPs such as PT, DM, AC, FO, C&I, switchgear, HT/LT, power Transformer, Fire Protection and Insulation etc. Compactness of site were faced. |                                                            |                        |       |                        |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |  |

| Reasons for Delay            |                                                                                         | Being CFBC Boiler that too 250MW Lignite based. Lot of design modification done. Non readiness of Lignite and Lime handling system. Non readiness of AHP. Due to non-readiness of Sea Water intake system alternate arrangement of sweet water has been made. As the allocated Lignite mines are yet to be made ready, the Lignite has been arranged from other mines. <b>Failure of Turbine bearing has been sent for rectification at BHEL works.</b> Sequential availability of material for erection by BHEL. Manpower mobilization by Sub-contractor of BHEL. |               |                        |       |                        |       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

Single shaft (or common shaft) configuration (1GT+1ST+1HRSG +1Gen.) is being used in the project Class gas turbines (V94.3A) of high efficiency (more than 58%) has been used. Main Machine erection started in 08/11. Power evacuation is from 400 kV GIS. Commissioning in <b>open cycle achieved on 03.12.12. Combined cycle commissioning achieved on 20.01.13. COD achieved on 04.04.13.</b><br><br><b>BoPs:</b><br><br>All BoPs were commissioned as per schedule. |
