|         | <b>Power Evacuation System:</b> Connectivity of the plant with 220/132kV Mahua Khera Ganj substation has been approved. LILO of 220kV circuit from 400kV Kashipur to 220 kV Mahua Khera Ganj is required. Long Term Access (LTA) from 220kV/132kV Mahua Khera Ganj substation has been approved by PGCIL. |          |                                                                                                |       |                             |      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |

FSA signed for U-1 &U-2 for 1.3 MTPA on 28.08.13 and 23.09.13 respectively. |                        |       |                             |       | <b>* The dates would be decided after start of Boiler erection start.</b><br><br><b>As per the letter dated 08.07.15 the issues are as follows:</b><br><br><b>The project has been delayed due to funding constraint.</b> ( Blackstone through its subsidiary Sithe Global had committed to invest for equity of both the phases. However they stopped funding in Dec.,13) This leading to delay & cost overrun( Promoter equity till date is Rs. 889 cr. Proposal of the Cost over run approx. is Rs 1450 cr to Ph-I of the project. Has been put up for approval of SBI.As per the RBI guideline , banks can only fund 10% of the cost overrun which is acting as a major constraint in funding of the project.<br><b>PPA Issue:</b> There are limited case-I bid, which causing delay in tie up of power on long term, The states MP & Telangana have been withdrawn case-I bids. Apart from Tata Power Distribution 400 MW case-I bid, there is no case-I bid in the market. Because of non-availability of PPAs, lenders & investors are reluctant to finance the project.<br><b>FSA Issue:</b> Drawing the coal under FSA is signing of PPA.MOP/MOC to de-link validity of FSA without any condition precedents as there are no case-I bids. |

| Latest: The project authorities are busy in commissioning of 1 <sup>st</sup> unit of captive power plant and after that U-2 will be commissioned. In the meantime there will be transmission corridor problem.                                                                                                                                                                                                                                                                             |                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |          |                |          |              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| The first unit is already commissioned and COD conducted. There is no commercial interest for the Developer to commission the second unit as PPA is only for 300 MW out of plant capacity of 600 MW. However merchant sale/ short term sale can be effected for which the Dharamjaygarh link is to be made available. (2 Towers are stuck up for forest clearance) – The line is now projected for completion in Oct.'15. Accordingly 2 <sup>nd</sup> unit commissioning in Nov./ Dec.'15. |                                      |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                        |          |                |          |              |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

Blk-II GT erection progress was very slow due to poor support from BHEL-Hyderabad and less manpower of M/s Indwell. Poor quality of on base pipes had further delayed the erection work.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                                                                                                                                                                                                                           |

Cranking done on 3.3.13. FSNL achieved on 06.03.13. Synchronization achieved on 13.03.13. ST synchronization achieved on 26.03.13. Combined cycle commissioning achieved on 27.03.13 (Base load of 338MW).<br><b>Block-I:</b><br>1. On 08.08.09, truck carrying GT-1 from Mudra port to Pipavav site fell into river due to collapse of 3 <sup>rd</sup> span slab of the bridge over Shetrunji river near Bhavnagar (about 100 km from site). BHEL have now supplied new GT in place of that GT.<br>2. <b>GT-1:</b> Supply of GT was received at site on 10.7.11. GT erection started in 09/11. The work on Blk-I was on hold due to supply of damaged compressor rotor of GT-1. Replacement of damaged stator vanes has now completed. Now GT has boxed up. <b>GT FSNL achieved on 09.10.13.</b> GT synchronized on 10.10.13. IBH header rectification work completed on 03.12.13.<br><br>3. <b>HRSG-1:</b> Erection started on 24.11.09. HT completed in 11/11. Re-hydro test completed on 15.8.13. <b>ABO completed on 11/12.10.13.</b> SBO started on 15.10.13 but stopped due to IBH header failure on 18.10.13. Now after rectification of IBH header <b>SBO restarted on 10.12.13 and completed on 13.12.13. Normalization completed by end 12/13.</b><br>4. <b>ST-I:</b> Supply of HP-IP & LPT turbine received at site. Erection started on 22.10.11. ST box up already achieved. Oil flushing completed. TG is on Barring Gear. GRP pipeline rectification work started on 03.12.13 and its completion is expected by 15.01.14. Steam Dumping is expected on 20.01.14. <b>ST synch. achieved on 01.02.14. Combined cycle commissioning achieved on 5.2.14.</b><br>5. There is no provision of by pass stack hence GTs can not run in open cycle. |                                                                                                                                                                                                                           |

| 1.      | DGEN Mega Combined Cycle Power Project (M/s Torrent Energy Limited), Dahej SEZ, Bharuch                                                                                                                                                                      | 1200          |                                                                                                   |       |                             |           | 1. All statutory clearances are available.<br>2. Zero date of the project is 02.07.10.<br>3. Order for all the BOPs has already been placed and progressing as per schedule.<br>4. Single shaft (or common shaft) configuration is being used in the project. F Class gas turbines (V94.3A) of high efficiency (more than 58%) will be used.<br>5. M/s Tata Consultant Engineers is appointed for engineering review, project monitoring and quality assurance for the project.<br><b>MODULE-I</b><br>1. The order for main plant civil & structural work has been awarded on Gammon India and M/s Simplex Infrastructure.<br>2. The order for GT, GTG, ST, STG along with condenser has placed on M/s Siemens AG ,Germany.<br>3. The order for HRSG has placed on M/s Doosan Korea.<br><b>4. Module-I achieved baseload on 12.01.14.</b><br><b>MODULE-II</b><br>1. Piling work completed and foundations are under progress.<br>2. HRSG erection started in 06/11. All the three drums lifted. HARP module insertion is in progress.<br>3. ST & STG supply started.<br><b>4. ST erection start is expected shortly</b><br><b>5. Module-II achieved baseload on 23.04.14.</b><br><b>MODULE-III</b><br>1. HRSG erection started in 09/11 and is in progress.<br>2. ST & STG supply is expected shortly.<br>3. ST erection is yet to start.<br><b>4. Module-III achieved base load on 09.03.14.</b> |
