|         | <b>Power Evacuation System:</b> M/s IEPL has been granted connectivity & open access on 400KV Koradi-Wardha Double Circuit line. |               |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |       |                             |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|         | <b>Critical Areas</b>                                                                                                            |               | Commissioning of Koradi-Wardha 400kV double circuit line. <b>(Required for Start up Power)</b> BHEL supplies of generator stator from Haridwar. Regular Chimney is ready (Brick lining work is in progress).BLU and EDTA has been carried out through temporary Chimney. Synchronisation and full load is getting delayed due to non availability of Start up power and readiness of power evacuation system by MSETCL (ROW Issue). As a contingency arrangement PGCIL has granted start up power connectivity on Mouda-Deoli 400KV PGCIL line by providing LILO arrangement. Work on last tower is also completed on 22.10.12. Other formal clearances are in progress. Start up power received on 15.12.12. Switchyard back charged on 16.12.12. Delay is due to non-availability of evacuation line of MSETCL. |       |                             |           |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

| BOP Package : Purchase order placed on the consortium led by M/s Tecpro Systems Ltd, including civil works on EPC basis on 15-12-10. Now it is led by VA Tech. |                                                                    |                |                                      |                  |                                      |                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |

|                |                                                                                                                                                                                                                           |
|----------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Critical Areas | Delay in handover of various civil fronts and inputs by BOP contractor to BTG contractor (BHEL).                                                                                                                          |
|                | Slow progress of Civil works and BOP works by the consortium led by Techpro systems Ltd. Now the consortium leader is changed to VA Tech and APGENCO is making direct payments to consortium partners.- Action by APGENCO |
|                | Award of CHP, AHP by the consortium leader VA Tech.                                                                                                                                                                       |
| Delay reasons  | 1. Boiler erection start was delayed by 13 months due to initial land acquisition and civil works problems. Mill and ID, FD & PA foundation work not started.                                                             |
|                | 2. Slow progress of Civil works and BOP works by the consortium led by VA Tech, Techpro and Gammon.                                                                                                                       |

Unit-1 flue can erection in progress. Unit-2 Flue can fabrication completed.</li><li>• <b>NDCT:</b> CT-1 shell casting completed. Internals like precast column &amp; beams erection in progress. Fills received at site. CT-2 (148/170) shell casting in progress. Internal hot water duct &amp; internal columns are under progress.</li><li>• <b>CHP:</b> order placed on M/s Thyssen Krupp Industries India on 30-03-13. Crusher house erection is in progress. SR-1, 2 &amp; 3 equipment erection in progress. CW channel &amp; forebay completed.</li><li>• <b>AHP:</b> Order placed on BSBK Engineers Pvt. Ltd. on 05-02-13. Fly ash silo construction is completed. Bottom ash silo slab casted.</li><li>• <b>RWPH:</b> excavation and pile chipping is in progress.</li><li>• <b>PT Plant:</b> Order placed on VA Tech WABAG on 21-01-13. Desalination water pump house and tank raft completed. Raft is completed for PTP, Desalination water PH and tank, DMF/PSF areas. PCC &amp; raft work is in progress for SWRO reject tank, BWRO &amp; MB feed tanks, clarified water and filter storage tanks.</li><li>• <b>DM Plant:</b> Order placed on VA Tech WABAG on 21-01-13. Mechanical &amp; piping works completed. Electrical &amp; C&amp;I works are in progress. One stream is expected to be ready by Jul 2015.</li><li>• <b>CW S:</b> Order placed on M/s Jyoti Pumps Ltd on 07-11-12. CW pumps house structural fabrication completed. Operating floor civil works in progress. Intake (dia 1.6m, 1.15 km) and outfall pipeline (dia 1.6m, 1.6 km) laying completed in offshore &amp; onshore area. CW channel &amp; forebay completed.</li><li>• <b>FPS:</b> LOA issued to Agnive Fire Protection Limited on 11-07-13.</li><li>• <b>FOS:</b> LOA issued to United System &amp; Project Limited on 11-06-13. LDO/HFO tanks erection completed. Pump house civil work in progress.</li><li>• <b>Switchyard:</b> LOA issued to Ms ABB Ltd. on 12<sup>th</sup> Feb, 2013 for supply and erection of 400 kV GIS. GIS bays erection, cable laying in progress. Stringing of ACSR twin moose conductors from GT-1 to switchyard completed. Outdoor bus duct erection in progress.</li></ul> <b>Unit-1</b> <ul style="list-style-type: none"><li>• <b>Boiler:</b> erection started on 10-05-13. Divisional super heater erection completed. 7357/8448 MT pressure parts erection completed. Nearly 49616/52867 joints completed. ID fan erection in progress. 06/08 coal mills erected. Coal piping erection under progress. <b>HT:</b> done on 29/07/15.</li><li>• <b>ESP:</b> erection completed. Air leak test completed. Electrode alignment is under progress.</li><li>• <b>STG:</b> TG deck casting completed on 21.02.2014. Condenser erection started in 06/14. TG erection started in Jul'14. HIP, LP-1 &amp; LP-2 rotor placed centering works in progress. TG box-up expected in 01/16.</li><li>• Control room civil work is under progress.</li></ul> <b>Unit-2</b> <ul style="list-style-type: none"><li>• <b>Boiler:</b> Boiler erection started on 27-11-13. 7447/8448 MT pressure parts erection completed. Nearly 51437/52867 joints completed. ID fan foundation completed. 06/08 coal mills erected. <b>HT:</b> done on 01/16.</li><li>• <b>ESP:</b> Placement of collecting in progress. 6439/7732 MT erected.</li><li>• <b>STG:</b> Pile capping and pedestal work for TG building is under progress. Deck casting completed. TG erection started on 15.12.2014. Tube insertion in condenser is in progress. TG box-up expected in 01/16.</li><li>• Coal mills erection under progress.</li></ul> |  |

External platforms and all 27 corbels completed. Painting is completed.</li><li>• <b>CHP</b>: TP-6 reinforcement and shuttering are under progress.</li><li>• <b>APH</b>: cold end bracing erection completed</li><li>• <b>CWPH</b>: CWPH, pipeline &amp; fore bay RCC works completed and pipe laying is in progress. Raft for CWPH is in progress.</li><li>• <b>NDCT</b>: Ring beam completed and jump forms erection for 38/54 segment completed. 213/712 grillage columns completed and others are in progress. 3<sup>rd</sup> (24/54 segments) and 4<sup>th</sup> lift (10/54 segments) concreting is in progress.</li><li>• <b>PTP</b>: Chemical house and filter water reservoir PCC completed. Reservoir walls are under progress.</li><li>• <b>Boiler</b>: Erection started on 05-05-11 and the work is in progress. 8589.67/10011 MT structural material erected. 6550/6701 MT pressure parts erected and 31305/33097 HP joints and 38160.16/38959 Eq joints completed till 6/15. Foundations of PA, FD and ID fans completed and handed over for erection. Feeder floor concreting is in progress. Mills bowl extension ring capping is in progress. ESP inlet box welding, boiler to PA fan duct wall pre-assembly is in progress. FD and ID fan foundations completed and handed over to BHEL.</li><li>• <b>Drum</b>: lifting achieved on <b>07-04-12</b>.</li><li>• <b>HT</b>: conducted on <b>24-06-2013</b> &amp; <b>BLU</b> done on 31/ 05/15. <b>SBO</b> completed on <b>30/08/15</b>.</li><li>• <b>ESP</b>: 'A' and 'B' passes are ready for BLU activity. 'C' and 'D' pass Field alignment completed.</li><li>• <b>FOS</b>: HFO tank RCC and bottom PCC work completed. Dyke wall construction on west side is in progress.</li><li>• <b>WTP</b>: Chemical house construction is in progress. Filter water pump house completed. Back wash sump and sludge pit RCC completed. Chemical building and clarifier water tank completed.</li><li>• <b>DM</b>: Nozzle fitting up, restoration of rolling shutters and are frontal piping are under progress.</li><li>• <b>CWS</b>: Fore bay raft &amp; channels completed except top raft. CW pipes erection is under progress. Pump house raft completed.</li><li>• <b>TG Deck</b>: Condenser erection is in progress. TG erection started in 05/13. IP lower outer casing centering is in progress. MDBFP alignment is in progress. TDBFP A-deck completed and staging for B-deck is in progress. CEP pit is completed and handed over to BHEL.</li><li>• <b>Switchyard</b>: Foundations for SAT, UAT and ST completed. GT foundations and walls are under progress.</li></ul> |

External platform and corbels casting completed. AR brick lining completed. Hopper work completed. Painting and lighting works are in progress.</li><li>NDCT: Awarded to M/s Paharpur on 16.07.12. Pond floor and pond wall completed. Shell casting up to 177.5 m completed. Erection of hot water riser and distributor pipes is in progress. Fill erection to be taken up after receipt of steel rods from Kolkata.</li><li>CHP: Erection of rails, stacker re-claimer is in progress. Structural erection of junction towers and trestles is in progress. RCC for BCN 13 A/B completed. Structural erection of galleries is in progress. All mills and bunkers erection completed. RHS tripper erection started and that of LHS yet to be taken up.</li><li>AHP: Order placed on M/s DC Industrial Plant Services on 5-7-11. Vacuum pumps, motors and compressors erected. Silo shells and bottom ash hopper completed. Erection of FAE towers, ash pipes below ESP and up to ash silo, from bottom ash hopper, ash slurry &amp; ash water pump house is held up due to non availability of material.</li><li>CWPH: All 3 ACW and 3 CW Pumps erected along with motors. 2 CW pumps erection is in progress. Pipe erection completed.</li><li>DM: Storage tanks 1&amp;2 erected and DM make up water pump house erected. Equipment erection completed. Commissioning is in progress.</li><li>FOPH: FOPH is completed, all equipment &amp; motors erected. Oil piping is completed and is in use.</li><li>Boiler: Erection commenced on 26-11-12. HT completed on 30-11-14 / 02-02-15. Welding joints completed. ID1&amp;2, FD1 and PA1 fans erection completed. Foundation of FD2 &amp; PA2 fans is in progress. Hot gas duct for second stream is yet to be taken up.</li><li>BLU: conducted on 28-03-15. EDTA completed on 02-05-15.</li><li>SBO: started on 25<sup>th</sup> July 2015. 1<sup>st</sup> stage SBO completed and 2<sup>nd</sup> stage is in progress</li><li>ESP: Erection of emitting electrode in all passes completed. Inlet duct air leakage test for A&amp;B passes completed. Insulation and cladding is in progress. ESP control room is ready.</li><li>STG: Erection of TG was started on 12-11-13. TG boxed up on 12<sup>th</sup> June 2015. TG put on barring gear on 15-09-15. TDBFP oil flushing is to be taken up. Barring gear erected.</li><li>FPS: Supply of equipment is completed and erection is in progress in some areas.</li><li>Switchyard: All 400 kV equipment erected. Gravel spreading in switchyard area completed. Switchyard control room equipment testing and commissioning completed. Switchyard charged on 26-06-15.</li></ul> |
