

Website Monitoring Plan

The website (www.cea.nic.in) is periodically monitored to maintain its optimal performance. Key monitoring parameters include:

- **Performance:** Ensuring the website operates efficiently and without disruptions by coordinating with National Informatics Centre (NIC).
- **Functionality:** Verifying that all features and content are working as intended.
- **Broken Links/ Dead Links:** Identifying and fixing any broken or non-functional links.
- **Traffic Analysis:** Monitoring website traffic using Google Analytics Platform to help improve user experience.

Feedback Mechanism:

A feedback form is available for visitors to share their input. The feedback received is analysed and used to enhance the website, incorporating suggestions from visitors to improve its overall functionality and efficiency.
