भारत उत्पादन संतुलन रिपोर्ट 2017-18

LOAD GENERATION BALANCE REPORT
2017-18

Ravindra Kumar Verma
Chairperson
Central Electricity Authority

Foreword

The Load Generation Balance Report (LGBR) is brought out annually by Central Electricity Authority towards fulfillment of its obligations under section 73(a) of the Electricity Act, 2003. The annual Load Generation Balance Report (LGBR) for the year 2017-18 is the thirty-sixth publication in the series brought out by CEA. The Report covers the month-wise anticipated energy requirement and availability (in MU) as well as peak demand and availability (in MW) for the year 2017-18 considering all India annual generation target of 1229.4 BU, finalized by CEA and approved by Ministry of Power after detailed discussions with the States/ Utilities and Central/ State/ Private Generation Companies and availability from import of Power from Generation Projects in Bhutan and also availability from non-conventional and renewable energy sources in the country. The report also brings out comparison of the actual Power Supply Position with the forecasted Power Supply Position indicated in LGBR for the year 2016-17.

Assessment of unrestricted peak demand and unrestricted energy requirement and peak and energy availability of constituent states of each Region has been done by the respective Regional Power Committees (RPCs) after review of the projections made by the constituent states, past data and the trend analysis. The inputs provided by the RPCs have been analyzed and the anticipated month-wise power supply position for each State, Region and the Country has been prepared by CEA. As per this LGBR, the country is likely to experience energy surplus of 8.8% and peak surplus of 6.8%. State-wise power supply position shows that most the states/UTs would be having surplus energy, and the remaining few states/UTs would need to arrange additional power from them to meet their peaking and/or energy shortages during 2017-18.

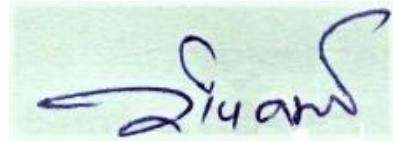

During the year 2016-17, a total of 26,300 circuit-km (ckm) of transmission lines and 81,816 MVA transformation capacity was added in Central, State & Private Sector. This includes 2 nos. of 800kV HVDC line, 11 nos. of 765kV lines & 30 nos. of 400kV lines in Central Sector and 1 no. of 765kV, 33 nos. of 400kV & 147 nos. of 220kV lines in State Sector. Further, 4 nos. of 765kV, 22 nos. of 400kV & 2nos. of 220kV totaling 4,578 ckm of Transmission lines were added in Private Sector during this period. With the commissioning of these transmission lines, the inter-state and intra-state capability of power transfer in the country enhanced considerably. Further, a generating capacity addition of 13,405 MW has been considered in the LGBR for 2017-18. These measures are expected to facilitate the deficit states to reduce / eliminate their shortages.

I hope that the Load Generation Balance Report would provide valuable inputs to the Utilities for their operational planning, including bilateral tie-ups. The report would enable the States/ Utilities to plan their power supply and demand so as to minimize the energy and peak shortages. The information on the anticipated power supply position in the various States would also be useful to those involved in the power trading.

I would like to place on record my appreciation for special efforts made by Shri Dinesh Chandra, Chief Engineer, in supervising the entire exercise and Shri Vikram Singh, Director; Shri Annepu Suresh, Deputy Director and Shri

Anshuman Swain, Assistant Director in compilation and bringing out this publication. Thanks are also due to Operation Performance Monitoring Division of CEA for setting the Generation Targets for the year 2017-18 and the Member Secretaries of all the five RPCs along with their team for furnishing the requirement/ availability figures for 2017-18 after having detailed discussions with the constituents of the concerned region.

Feedback from the users for improvement in the Report is welcome.

**New Delhi
May, 2017**

(Ravindra Kumar Verma)

ANNEXURES

Annex-I	Month-wise power supply position of India in 2016-17
Annex-II	Actual power supply position in terms of energy requirement vis-à-vis energy availability of various States/ Systems during the year 2016-17
Annex-III	Actual power supply position in terms of peak demand vis-à-vis peak met of various States/ Systems during the year 2016-17
Annex-IV(A)	Month-wise power supply position of States/ UTs during the year 2016-17 (in terms of energy)
Annex-IV(B)	Month-wise power supply position of States/ UTs during the year 2016-17 (in terms of peak)
Annex-V	Scheduled energy drawal by the States/ UTs vis-à-vis their entitlement from Central Generating Stations during the year 2016-17
Annex-VI(A)	Comparison of the constituent-wise forecast vis-à-vis actual power supply position for the year 2016-17 (in terms of peak)
Annex-VI(B)	Comparison of the constituent-wise forecast vis-à-vis actual power supply position for the year 2016-17 (in terms of energy)
Annex-VII	Maintenance schedule of Nuclear/ Thermal/ Hydro based power generating stations for the year 2017-18
Annex-VIII	Generating Schemes Expected to be commissioned during 2017-18
Annex-IX	Allocation of power from Central Generating Stations as on 31.03.2016 of the Northern, Western, Southern, Eastern and North Eastern Regions
Annex-X	Anticipated month-wise power supply position of All India during the year 2017-18
Annex-XI(A)	Anticipated month-wise power supply position of Northern Region during the year 2017-18

Annex-XI(B)	Anticipated month-wise power supply position of Western Region during the year 2017-18
Annex-XI(C)	Anticipated month-wise power supply position of Southern Region during the year 2017-18
Annex-XI(D)	Anticipated month-wise power supply position of Eastern Region during the year 2017-18
Annex-XI(E)	Anticipated month-wise power supply position of North Eastern Region during the year 2017-18
Annex-XII	Anticipated annual power supply position in each State/ UT for 2017-18
Annex-XIII	Anticipated month-wise power supply position of various States/ UTs for 2017-18

EXHIBIT

Exhibit - I	Pattern of Peak Demand & Energy Requirement of the country and five Regions during 2012-13, 2013-14, 2014-15, 2015-16 and 2016-17 along with forecasted demand pattern for 2017-18
--------------------	---

EXECUTIVE SUMMARY

1. The assessment of the anticipated power supply position in the country during the year 2017-18 has been made taking into consideration the power availability from various stations in operation, including non-conventional energy sources, fuel availability, and anticipated water availability at hydro-electric stations. A capacity addition of 13,405 MW during the year 2017-18 comprising 11,366 MW of thermal, 1,539 MW of hydro and 500 MW of nuclear power stations has been considered. The gross energy generation in the country has been assessed as 1229.4 BU from the conventional power plants in operation and those expected to be commissioned during the year in consultation with generating companies/ SEBs and taking into consideration the proposed maintenance schedule of the units during the year. The monthly power requirements for all States/ UTs in terms of peak demand and energy requirement have been assessed considering the past trend and have been finalized in consultation with the concerned authorities taking into consideration the specific factors, if any. The anticipated power supply position of each state has been worked out and the assessment of anticipated surplus/ shortages has been made which has been discussed at the fora of Regional Power Committees. Based on the studies carried out as above, the anticipated power supply position of the country, region-wise emerges as presented in the Table below:

Anticipated All India Power Supply Position for the year 2017-18

State / Region	Energy				Peak			
	Requirement (MU)	Availability (MU)	Surplus (+)/ Deficit (-)		Demand (MW)	Availability (MW)	Surplus (+)/ Deficit (-)	
			(MU)	(%)			(MW)	(%)
Northern	373,301	409,715	36,415	9.8	56,800	60,600	3,800	6.7
Western	366,956	414,595	47,639	13.0	48,842	57,224	8,382	17.2
Southern	323,146	347,051	23,905	7.4	44,908	45,355	447	1.0
Eastern	150,151	149,871	-280	-0.2	21,577	23,743	2,166	10.0
North-Eastern	16,106	16,595	488	3.0	2,727	2,802	75	2.7
All India	1,229,661	1,337,828	108,167	8.8	169,130	180,601	11,471	6.8

2. The net energy availability and demand met includes anticipated injection from non-conventional energy sources, surplus power from CPPs and tied up capacity from IPPs.
3. The above anticipated All India power supply position indicates that the country is likely to have a peak surplus of 6.8% and energy surplus of 8.8 %.
4. Surplus energy is anticipated of the order of 7.4%, 13.0%, 9.8% and 3.0% in the Southern, Western, Northern and North-Eastern Regions respectively. Eastern region is likely to face minor energy shortage of 0.2% which can be met from surplus power in other regions. The peaking surplus is likely to prevail in all the regions viz. Northern, Western, Southern, Eastern and North-Eastern Regions to the tune of 6.7%, 17.2%, 1.0%, 10.0% and 2.7% respectively.
5. The anticipated State-wise power supply position for the year is given in the Table below. The month-wise power supply position in various states/regions has also been given in the Report. There would be surplus energy in a number of states of Southern and Western regions while some demand-supply gap is likely to be experienced by some states, mostly in Northern, Eastern and North-Eastern region. This information may be useful for the utilities which are likely to experience demand-supply gap, to tie-up bilateral exchanges/ purchase of power from the states having surplus power.

Anticipated Power Supply Position in the Country during 2017-18

State / Region	ENERGY				PEAK			
	Requirement	Availability	Surplus(+) / Deficit (-)	Requirement	Availability	Surplus(+) / Deficit(-)		
	(MU)	(MU)	(MU) (%)	(MW)	(MW)	(MW) (%)		
Chandigarh	1,707	1,665	-43	-2.5	390	365	-25	-6.4
Delhi	32,396	38,346	5,950	18.4	6,560	6,657	97	1.5

LOAD GENERATION BALANCE REPORT

2017-18

1. INTRODUCTION

The Load Generation Balance Report (LGBR) brings out the likely month-wise position of power in terms of requirement and availability while simultaneously identifying the States with surplus power, which could be procured/ contracted by the States facing deficit. The LGBR, brought out by CEA, also presents a review of the actual power supply position during the previous year in the country. Most importantly, it makes an assessment of the power requirement of various states during the upcoming year, as well as an assessment of power availability from generating stations either owned by them or through their shares in the common/ central sector projects or based on long term and medium term contracts.

2. ACTUAL POWER SUPPLY POSITION DURING 2016-17

2.1 All India

During the year 2016-17, total ex-bus energy availability increased by 4.1% over the previous year and the peak met increased by 5.7%. The energy requirement registered a growth of 2.6% during the year against the projected growth of 9.0% and Peak demand registered a growth of 4.0% against the projected growth of 7.8%.

	2015-16	2016-17	2016-17 (Projected)	Actual Growth (%)	Projected Growth (%)
Energy Requirement (MU)	1,114,408	1,142,929	1,214,642	2.6	9.0
Peak Demand (MW)	153,366	159,542	165,292	4.0	7.8
Energy Availability (MU)	1,090,851	1,135,334	1,230,677	4.1	12.8
Peak Met (MW)	148,463	156,934	171,440	5.7	15.5

Overall, the country recorded the lowest ever demand-supply gap both in terms of energy and peaking as given below. Even this demand-supply gap was due to factors other than non-availability of power in the country.

	Energy (MU)	Peak (MW)
Requirement	1,142,929	159,542
Availability	1,135,334	156,934
Shortage	-7,595	-2,608
(%)	-0.7	-1.6

The month-wise power supply position in the Country during the year is given in **Annexure-I**.

2.2 Region-wise Actual Power Supply Position

Western, Southern & Eastern Regions met the demand almost in full with insignificant demand-supply gap both in terms of energy and peaking. Northern & North-Eastern Regions experienced minor demand-supply gap in terms of energy and/or peaking, on an overall basis. The demand-supply gap was on account of the factors other than non-availability of power e.g. transmission & distribution constraints. However, there were short-term surpluses in most of the states at some point of time or the other depending on the season or time of the day. The surplus power was sold to deficit states or consumers either through bilateral contracts, Power Exchanges or traders. Region-wise picture with regard to actual power supply position in the country during the year 2016-17 in terms of energy and peak is given below:

Region	Energy				Peak			
	Requirement	Availability	Surplus / Deficit (-)		Demand	Availability	Surplus / Deficit (-)	
	(MU)	(MU)	(MU)	(%)	(MW)	(MW)	(MW)	(%)
Northern	349,172	343,513	-5,659	-1.6	53,372	52,612	-760	-1.4
Western	345,247	345,127	-120	0.0	48,531	48,313	-218	-0.4
Southern	305,586	305,107	-480	-0.2	42,232	42,232	0	0.0
Eastern	127,783	126,868	-916	-0.7	18,908	18,788	-120	-0.6
North-Eastern	15,140	14,720	-420	-2.8	2,487	2,475	-12	-0.5

2.3 State-wise Actual Power Supply Position

The details of annual power supply position in terms of energy requirement vis-à-vis energy availability of various States/ Systems during the year 2016-17 are given in **Annexure – II**. As already mentioned above, demand-supply gap experienced in any State/UT was due to factors other than inadequate availability of power.

It may be seen that in **Northern Region**, Chandigarh, Delhi, Punjab and Haryana met the electricity demand almost in full. Rajasthan, Himachal Pradesh, Uttarakhand and Uttar Pradesh experienced energy shortages in the range of 0.6-1.7%. The maximum energy shortage in Northern Region viz. 18.4%, was in Jammu & Kashmir.

In **Western Region**, all the states i.e. Gujarat, Goa, Maharashtra, Madhya Pradesh & Chhattisgarh met the demand almost in full.

In **Southern Region** also, all the states/UT viz. Tamil Nadu, Telangana, Andhra Pradesh, Puducherry and Kerala met the demand almost in full., with minor demand-supply gap in some cases being on account of the reasons other than non-availability of power.

In **Eastern Region**, all the States except Bihar i.e. Sikkim, Odisha, West Bengal, DVC and Jharkhand met the demand almost in full. The maximum energy shortage of 2.3% was faced by Bihar.

In **North-Eastern Region**, Meghalaya faced no energy shortage. Arunachal Pradesh, Mizoram, Nagaland and Tripura faced energy shortages in the range of 1.3—2.6%. The maximum energy shortage in North-Eastern Region was in Assam and Manipur at 3.4% and 3.6%, respectively. The shortages witnessed were partly on account of constraints in transmission, sub-transmission & distribution system.

The constituent-wise details of actual peak demand vis-à-vis peak met during the year 2016-17 are shown in **Annexure-III**. It may also be seen that the Northern,

Western, Eastern and North Eastern Regions faced peaking shortage of 1.4%, 0.4%, 0.6% and 0.5% respectively, while Southern Region faced no peak shortage.

2.4 Month-wise Actual Power Supply Position

The month-wise power supply position of various states of the Country is given in **Annexure-IV (A) and IV (B)**.

2.5 Power Supply from Central Generating Stations

The scheduled energy drawal by the beneficiary States/ UTs vis-à-vis their entitlement from Central Generating Stations during the year 2016-17 is given in **Annexure-V**.

3. ACTUAL POWER SUPPLY POSITION VERSUS L.G.B.R. FOR THE YEAR 2016-17

3.1 All India

As per LGBR, the forecast of all India energy requirement, energy availability, peak demand and peak met for the year 2016-17 were greater than the actual figures by 3.5 to 8.5%. Forecast vis-à-vis actual power supply position of the country is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	1,214,642	1,142,929	-5.9
Energy Availability (MU)	1,230,677	1,135,334	-7.7
Peak Demand (MW)	165,292	159,542	-3.5
Peak Demand Met (MW)	171,440	156,934	-8.5

3.2 Region-wise/ State-wise comparison of LGBR vs Actual Power Supply Position

A comparison of the state-wise actual power supply position both in terms of peak and energy as against the forecast in respect of various regions for the year 2016-17 is given in **Annexure –VI(A) & VI(B)** respectively. Variation in energy availability and peak met of the states were caused by changes in allocation from central sector projects and bilateral energy contracts of the states, which were not envisaged during the preparation of LGBR. Region-wise analysis of forecast vis-à-vis actual power supply position is given below:

3.2.1 Northern Region

Forecast vis-à-vis actual power supply position of Northern Region is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	357,459	349,172	-2.3
Energy Availability (MU)	351,009	343,513	-2.1
Peak Demand (MW)	55,800	53,372	-4.4
Peak Demand Met (MW)	54,900	52,612	-4.2

The actual energy requirement, energy availability, peak demand and peak met in the Northern Region for 2016-17 were lower by 2.3%, 2.1%, 4.4% and 4.2% respectively. The actual energy shortage witnessed was 1.6% against the projected figure of 1.8%.

There was no energy shortage in Chandigarh against a forecasted shortage of 0.9%. Delhi had marginal shortage against projected surplus of 18.6%. Haryana had no energy shortage against forecasted surplus of 2.5% on account of lower energy requirement and lower energy availability as compared to the forecast. The actual energy shortage in the case of Himachal Pradesh was 0.6% as against the anticipated energy surplus of 3.2%. The actual shortage in case of Jammu & Kashmir was 18.4% against anticipated shortage of 14.3% due to higher energy requirement and lower energy availability than anticipated. In case of Punjab,

there was no energy shortage against a forecasted shortage of 7.3% on account of higher energy availability. Rajasthan had energy shortage of 0.6% against a forecasted shortage of 0.2%. Uttar Pradesh had energy shortage of 1.7% against forecasted shortage of 6.4%. Uttarakhand experienced a shortage of 0.6% against anticipated energy shortage of 2.5% during the year. States which were anticipated to be surplus, sold their surplus power through bilateral/ collective power transactions.

3.2.2 Western Region

Forecast vis-à-vis actual power supply position of Western Region is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	379,087	345,247	-8.9
Energy Availability (MU)	405,370	345,127	-14.9
Peak Demand (MW)	51,436	48,531	-5.6
Peak Demand Met (MW)	56,715	48,313	-14.8

The actual energy requirement, energy availability, peak demand and peak demand met in the Western Region were lower than the forecast by 8.9%, 14.9%, 5.6% and 14.8%. The actual energy shortage in the Region was negligible as anticipated due to forecasted surplus of 6.9%.

All the states of Western Region experienced hardly any shortage as anticipated. Chhattisgarh had negligible shortage of 0.2% against forecast surplus of 5.7%. Gujarat did not face any energy shortage as anticipated i.e. forecast surplus of 4.2%. Madhya Pradesh also experienced no energy shortage against a forecast surplus of 11.9%. The actual energy shortage in Maharashtra was also Nil, as anticipated due to estimated energy surplus of 7.4%. In case of Goa, the actual energy shortage was negligibly small i.e. 0.1% as anticipated. Daman & Diu and Dadra & Nagar Haveli faced no energy shortages as anticipated (forecast of energy surplus of 2.2% each).

3.2.3 Southern Region

Forecast vis-à-vis actual power supply position of Southern Region is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	310,564	305,586	-1.6
Energy Availability (MU)	323,727	305,107	-5.8
Peak Demand (MW)	40,008	42,232	5.6
Peak Demand Met (MW)	44,604	42,232	-5.3

The actual peak demand in Southern Region was higher by 5.6% than the predicted one. The actual energy shortage in the Region was negligibly small i.e. 0.2% as anticipated (forecasted energy surplus to the tune of 4.2%). The actual energy requirement, availability and peak demand met of the Southern Region were less than anticipated.

Andhra Pradesh and Telangana experienced no energy shortages against forecasted energy shortages of 7.6% and 3.3% respectively. While the former managed its shortage by arranging additional power, the latter managed it through demand side management. The actual energy shortage in Karnataka was very small i.e. 0.5% as anticipated (forecast surplus of 4.6%). The actual energy shortage in Kerala was also negligibly small i.e. 0.2% as anticipated in view of forecast surplus of 4.5%. There was no energy shortage in Tamil Nadu as anticipated in view of forecast surplus of 13.0%. Similarly, the actual energy shortage in Puducherry was negligibly small i.e. 0.1% as anticipated in view of forecast surplus of 13.1%.

3.2.4 Eastern Region

Forecast vis-à-vis actual power supply position of Eastern Region is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	151,336	127,783	-15.6
Energy Availability (MU)	135,713	126,868	-6.5
Peak Demand (MW)	21,387	18,908	-11.6
Peak Demand Met (MW)	22,440	18,788	-16.3

The energy requirement, energy availability, peak demand and peak met were lower than anticipated by 15.6%, 6.5%, 11.6% and 16.3% respectively. There was energy shortage of 0.7% in the Eastern Region against anticipated shortage of 10.3%.

The actual energy shortage in Bihar was 2.3% against the projected shortage of 25.2% due to higher energy availability. DVC met its demand almost in full with minor demand-supply gap of just 0.7% in terms of energy as anticipated in view of forecast energy surplus of 3.4%. Jharkhand faced marginal energy shortage of 0.7% against anticipated energy shortage of 30.0%, mainly due to increased availability. Odisha faced no energy shortage as anticipated. The energy shortage in West Bengal was contained upto 0.3% as against projected shortage of 13.7% mainly due to reduced demand.

3.2.5 North Eastern Region

Forecast vis-à-vis actual power supply position of North Eastern Region is given below:

Power Supply Position	LGBR	Actual	Deviation (%)
Energy Requirement (MU)	16,197	15,140	-6.5
Energy Availability (MU)	14,858	14,720	-0.9
Peak Demand (MW)	2,801	2,487	-11.2
Peak Demand Met (MW)	2,695	2,475	-8.2

The actual energy requirement, energy availability, peak demand and peak demand met in North Eastern Region during 2016-17 was lower than anticipated

by 6.5%, 0.9%, 11.2% and 8.2% respectively. The actual energy shortage in the Region was 2.8% as compared to forecast shortage of 8.3%.

The actual energy shortages in Arunachal Pradesh, Assam, Manipur and Nagaland were 2.1%, 3.6%, 3.4% and 1.9% against the anticipated shortages of 8.9%, 22.4%, 3.6% and 15.0% respectively. The main reason for lower energy shortages than the anticipated were lower actual energy requirement and higher actual energy availability than the anticipated figures. The actual energy shortages in the case of Mizoram and Tripura were 2.6% and 1.3% against anticipated surplus of 10.6% and 73.9% respectively due to lower energy availability than the forecast. The lower energy availability was due to net export of power by Mizoram and Tripura through bilateral contracts or through traders. Meghalaya did not face any energy shortage against an anticipated shortage of 6.8% due to lower energy requirement.

4. LOAD GENERATION BALANCE REPORT FOR THE YEAR 2017-18

4.1 Overview

The exercise for formulating the anticipated power supply position in the country for the next year 2017-18 involves (a) assessment of power requirements in each State (month-wise) in terms of unrestricted energy requirement and peak demand and (b) realistic estimate of electricity availability both in terms of energy and capacity from various sources. While the peak demand and energy requirement in the States are worked out on the basis of the trend analysis considering the actual data for the preceding years as also the specific load requirements, if any, as per established methodology; the energy availability is worked out on the basis of generation targets set by CEA after detailed consultations with the generating companies/ Utilities and approved by Ministry of Power. The Regional Power Committees prepare the estimates of month-wise power requirement and availability for each of its constituents and finalize the same in consultation with them. The region-wise power supply position is coordinated by CEA to arrive at the all India power supply position.

The studies carried out for anticipated power supply position for the year 2017-18 indicate that there would be energy surplus of 8.8% and peak surplus of 6.8% in the country during 2017-18.

The methodology for assessment of power supply position in the country, each Region and State is discussed in the succeeding paragraphs.

4.2 Assessment of Power Supply Position for 2017-18

4.2.1 Energy Generation Targets

The assessment of gross energy generation in the country during the year 2017-18 has been carried-out in CEA taking into consideration the past performance of the thermal plants, their vintage and maintenance schedule of the generating units during the year, likely partial and forced outages and availability of fuel etc. The maintenance schedule of nuclear/ thermal/ lignite based thermal power generating stations for the year 2017-18 is given in **Annexure-VII**.

In case of hydroelectric power plants, the storage position of reservoirs, extent of utilization of stored waters till the onset of next monsoon, estimates of carryover waters to next hydrological year and estimates of generation considering the anticipated inflows and past performance are taken into consideration while estimating gross generation. The generation from new units considering their commissioning schedule has also been included in the estimates of the generation targets. A capacity addition programme of 13,405 MW during the year has been considered comprising as under:

Category	Installed Capacity (MW)
Thermal	11,366
Hydro	1,539
Nuclear	500
Total	13,405

The details of the new generating units for benefits during 2017-18 along with the commissioning schedule are given in the **Annexure-VIII**. The gross energy

generation target of 1229.4 BU for the year 2017-18, fixed in consultation with the various generating companies and approved by Ministry of Power is detailed as under:

Type	Generation Target (BU)
Thermal	1042
Nuclear	41
Hydro	141.4
Bhutan Import	5
Total	1229.4

4.2.2 Assessment of Energy Availability

The net energy availability (ex-bus) corresponding to gross energy target as finalized in CEA/ MoP (following the procedure as discussed above) is computed for all generating plants taking into consideration the normative auxiliary consumption. The energy availability in each State is worked out at respective Regional Power Committee Secretariat as under:

- (a) Generation from generating plants owned by the State,
- (b) Share of Power from the common projects,
- (c) Allocation of firm power from Central Generating Stations (CGSs),
- (d) Allocation from unallocated quota of power from Central Generating Stations as per the allocation in vogue.
- (e) Energy import/ export under long term bilateral agreements including that from IPPs.
- (f) Generation from Non-conventional and renewable energy sources, support from Captive Power Plants and generation from IPPs.

The allocation of power (firm as well as unallocated) from Central generating stations as on 31.03.2016 is given in **Annexure-IX**. The short-term exchange as per bilateral contracts and exchange of energy through exchanges is generally not taken into consideration. Depending upon the actual exchanges and over-drawals/ under-drawls of energy against schedule, the availability of power to a State may change.

4.2.3 Assessment of Peak Availability

The estimated peak availability is calculated from the units available for generation in the various utilities in different months after considering scheduled maintenance in the RPC forum and auxiliary consumptions.

4.2.4 Assessment of Power Requirement

The assessment of the constituent-wise unrestricted peak demand and energy requirement of each region is made using the past data and trend analysis in consultation with the concerned state/ UTs and finalized after detailed discussions at respective RPCs (for the forecast of the peak demand and energy requirement).

4.2.5 Assessment of Shortage/Surplus

The anticipated electricity shortage or surpluses are calculated as a difference between the net unrestricted anticipated requirement and the net anticipated availability in terms of energy and peak demand.

4.3 Consultations with States/ UTs

The exercise for arriving at the targets for anticipated energy generation during the year 2017-18 has been carried out in CEA following a detailed consultation process with the generating companies where the aspects like the maintenance schedule are also discussed and finalized. The month-wise power requirements and the net peak and energy availability have been discussed at RPC level with their constituents and finalized based on the total energy availability target finalized by CEA/ MoP.

4.4 Anticipated Power Supply Position during 2017-18

4.4.1 All India

During the year 2017-18, there would be anticipated energy surplus of 8.8% and peak surplus of 6.8%. The annual energy requirement & energy availability and peak demand & peak availability in the country are given in the Table below.

Particulars	Energy (MU)	Peak (MW)
Requirement	1,229,661	169,130
Availability	1,337,828	180,601
Surplus(+)/ Shortage (-)	108,167	11,471
Surplus(+)/ Shortage(-) %	8.8	6.8

The month-wise power supply position of the country is given at **Annexure-X**.

4.4.2 Region-wise Power Supply Position

The region-wise anticipated month-wise power supply position for 2017-18 is given at **Annexure-XI** and is summarized in the Table below:

State / Region	Energy				Peak			
	Requirement (MU)	Availabilit (MU)	Surplus (+)/ Deficit (-) (MU)	Demand (MW)	Availabi (MW)	Surplus (+)/ Deficit (-) (MW)		
						(%)	(%)	
Northern	373,301	409,715	36,415	9.8	56,800	60,600	3,800	6.7
Western	366,956	414,595	47,639	13.0	48,842	57,224	8,382	17.2
Southern	323,146	347,051	23,905	7.4	44,908	45,355	447	1.0
Eastern	150,151	149,871	-280	-0.2	21,577	23,743	2,166	10.0
North-Eastern	16,106	16,595	488	3.0	2,727	2,802	75	2.7

It may be seen that in terms of energy, while the Eastern Region would meet its demand almost in full, other four regions would be surplus varying from 3 to 13% with 3.0% in the North-Eastern Region, 7.4% in the Southern Region, 9.8% in the Northern Region and 13.0% in the Western Region. In terms of peaking, Northern, Western, Eastern, Southern and North-Eastern Regions are likely to have peak surpluses of 6.7%, 17.2%, 1.0%, 10.0% and 2.7% respectively.

The pattern of peak demand and energy requirement in the country as well as in Northern, Western, Southern, Eastern and North Eastern Regions during 2012-13, 2013-14, 2014-15, 2015-16 and 2016-17 along with forecast demand patterns for 2017-18 are given at **Exhibit-1(A)** to **Exhibit -1(F)** respectively.

4.5 State-wise Power Supply Position

The State/UT-wise annual power supply position in each State/ UT is given in the **Annexure-XII**. It would be seen that 8 States/UTs would have energy deficit and 14 States/UTs would have peak deficit of varying degrees. Further, 26 States/UTs would have net surplus energy and 20 States/UTs would have peak surplus on annual basis.

Range	Number of States/ UTs	
	Energy	Peak
<u>DEFICIT</u>		
Above 20%	2	1
10% - 20%	2	7
5% - 10%	0	3
0% - 5%	4	3
Total	8	14
<u>SURPLUS</u>		
Above 20%	5	5
10% - 20%	10	2
5% - 10%	6	5
0% - 5%	6	9
Total	27	21

The month-wise details of energy requirement and peak demand and corresponding availability are given in the **Annexure-XIII**.

It would also be observed that Delhi, Himachal Pradesh, Rajasthan, Uttar Pradesh, Chhattisgarh, Gujarat, Madhya Pradesh, Maharashtra, Daman & Diu, Dadra & Nagar Haveli, Goa, Odisha, DVC, West Bengal, Mizoram, Meghalaya, Nagaland, Tripura, Andhra Pradesh, Tamil Nadu and Sikkim are likely to have both peaking and energy surplus on annual basis.

Haryana, Punjab, Karnataka, Telangana, Puducherry and Manipur are anticipated to have surplus on annual basis, only in terms of energy. For meeting peak deficit, these states may arrange power from surplus states.

All other States in the country are likely to have demand-supply gap of varying degrees both in term of energy and peaking, which can be met by arranging power from surplus states through various market mechanisms.

ANNEXURES

Month-wise power supply position of India in 2016-17								
Year	Peak (MW)				Energy (MU)			
	Peak Demand	Peak Met	Surplus(+) / Deficit(-)	(%) Surplus/Deficit	Energy requirement	Availability	Surplus(+) / Deficit(-)	(%) Surplus/Deficit

* OPTCL proposed to swap the dates of maintenance between Unit # 3 & 6 but NTPC did not agree immediately and informed that they will do the needful if situation permits as well as demand so. Subsequently, it would be finalised in OCC.

** WBSLDC did not agree for S/D of Bandel Unit#5 during Sep'17 as proposed and requested to shift it to Dec'17. WBPDCL assured to check from their side and confirm it later. They will discuss bilaterally & finalize and would be approved in OCC.

Station/ System/ State	Unit Number	Capacity (MW)	Start Date	End Date	No. of Maintenance Days	Reason
*** Though FSTPS Unit#4 was proposed for S/D during Aug-Sep'17 by NTPC, after discussion it was decided to shift the same after Durga Puja. Accordingly, their Unit#6 would also be shifted to Nov-Dec'17 after a gap of at least 7 days return of Unit#4.

Abbreviations used in respect of reasons for outage:

AMP: Annual Maintenance Plan
AMW: Annual Maintenance Work

AOH: Annual Overhaul

BSD: Boiler Shutdown
BTG: Boiler Turbine Generator
CI: Combustion Inspection
CI/BI: Combustion Inspection/ Borescope Inspection

HGPI: Hot Gas Path Inspection
HPT: High Pressure Turbine

HRSG: Heat Recovery Steam Generator
IBR: Indian Boiler Regulations
IPT: Intermediate Pressure Turbine
LPT: Low Pressure Turbine
MI: Major Inspection

PG/Test: Performance Guarantee Test
R&M: Renovation and Modernization

RLA: Residual Life Assessment
Static VR: Static Voltage Regulator/ Restorer

Bangladesh	250	0	250	250	0	0	0	
Total	76,105	68,098	8,007	2,032	5656	319	75	
Non-DoCo Capacity (###)	4,425							
Grand Total	80,530*							

(*): Includes 1350 MW from Bhutan

(#) This is total share allocated to constituents of the Region from Central Generating Stations of that region or other regions.

(# #) includes dedicated stations , non-firm power and merchant power.

(# # #) Capacity commissioned but yet to be declared under commercial operation includes 15 MW each of 3 units of Nimmo Bazgo, 195 MW of Muzaffpur TPS (Unit-3), 600 MW of Raghunathpur, Ph-I, 40 MW of Teesta Low Dam Unit 2, 500 MW of Bokaro-A(DVC Project), and 35 MW of Monarchak CCGT (ST), 500 MW of Unchahar-III TPS (Unit-7), 195 MW of Muzaffpur TPS (Unit-4), 800 MW of Kudgi STPP (Unit-1), 800 MW of Kudgi STPP (Unit-2), 250 MW of Bongaigaon Thermal PP (Unit 2), 660 MW of Mauda STPS-II (Unit-4)

Notes :

1) Allocated Capacity includes 440 MW non-firm power of RAPP 3 and 4, Out of this, 374 MW (=440-66 MW unallocated power) non-firm share of RAPP 3 and 4 is considered as firm power . "Not in common pool" includes unallocated power of RAPP 3 and 4 (66 MW), 153 MW unallocated power from Tala HEP and 100 MW diverted power to J&K from Unallocated power of Central Generating Stations of Western Region.

Changes During the Month :

1. CoD of Kudankulam NPP U# 2w.e.f. 31.03.2017

2.

Information for commissioning of 6 units was obtained: a. 500 MW of Unchahar-III TPS (Unit-7), b.195 MW of Muzaffpur TPS (Unit-4), c.800 MW of Kudgi STPP (Unit-1), d.800 MW of Kudgi STPP (Unit-2), e.250 MW of Bongaigaon Thermal PP (Unit 2), f.660 MW of Mauda STPS-II (Unit-2)

(#) This is total share of the Region in Central Generating Stations(including CGS located in other regions)

The shares as given in % may be taken, the MW values are indicative

Ø This comprises 1.01 MW (0.103%), 1.01 MW (0.103%) and 2.72 MW (0.278%) from NCTPS Dadri-II to HVDC Balia, Bhiwadi and Kurukshetra respectively.

\$ This comprises 0.8 MW (0.08%) from Rihand STPS, 0.83 MW (0.10%) from Dadri (G) and 2.5 MW (0.255%) from NCTPS Dadri-II to HVDC Rihand, Dadri and Agra respectively.

\$\$ This comprises 70 MW (8.43%) from Dadri GPS and 30 MW (4.53%) from Auraiya GPS

@ Allocated to Bangladesh

*Details available in the allocation sheet of respective region.

Changes during the month: Commissioning of Muzaffarpur TPS U#4

This is total share of the region in Central Generating Stations (including CGS located in other regions).

* 15% Unallocated Power of these stations (amounting to 288 MW) is not in Unallocated Pool

* Out of 1020 MW Capacity of Tala HEP, 85% allocated to ER and 15% (153 MW) to NR.

Note:

1. The % allocations shown are during peak hours (18-22 hrs). During other hours (00 to 18 and 22 to 24 hrs), % are different.

2. The shares as given in % may be taken, the MW values are indicative.

Out of DVC's surrendered share of 100 MW; 20 MW, 35 MW and 45 MW allocated to Assam, Tamil Nadu and Bihar respectively. In the Sheet, Bihar's 45 MW is already included in Firm Power allocation from Farakka, Kahlaon &

+ + 150 MW from Mejia U# 6 allocated to NR in lieu of Tala Power. Details shown against item C4(iv) below.

** DVC includes Bokaro(630MW), Chandrapur(890MW), Durgapur(1340MW), Maithon-G(90MW), Maithon-H(63MW), Mejia(2340MW), Panchet(80MW), Koderma(2*500MW).

3. 50 MW ER unallocated power allocated to Bangladesh.

4. 100 MW power through open access from RGPP(LWR) allocated to Jharkhand Railways w.e.f.16.01.2016.

ALLOCATION OF POWER FROM CENTRAL GENERATING STATIONS TO NORTH EASTERN REGION

(As on 31-03-2017)

2. Bongaigaon TPP %		250																
I. TOTAL POWER [=G+H]		2695																

Changes during the month: Commissioning of Bongaigaon TPP

(#) This is total share in Central Generating Stations

* 98 MW power from Pallatana GPP is allocated to IL&FS/OTPC.

** ER NTPC Stations here include Farakka (U# 1 to 5), Kahalgaon, Kahalgaon-II (3 units) and Talcher

Note:

1. The shares as given in % may be taken, the MW values are indicative.

2. Total share of Meghalaya in Loktak surrendered to Manipur

3. 42 MW surrendered by Meghalaya from NTPC ER Stations is allocated to Assam till further order.

Commissioned on 22.03.2017

Anticipated month wise power supply position of India during the year 2017-18
