**MINUTES OF THE MEETING HELD ON 09.05.2019 AT CEA, SEWA BHAWAN WITH OFFICIALS OF PVVNL REGARDING VOLUME – II OF 19<sup>TH</sup> EPS- DELHI (NCR)**

1. A meeting was held under the chairmanship of Chief Engineer (Power Survey & Load Forecasting Division) on 09.05.2019 in the Conference room 'Manan', 9<sup>th</sup> Floor, CEA, Sewa Bhawan, R K Puram at 15:00 Hrs with the officials of Paschimanchal Vidhyut Vitran Nigam Ltd (PVVNL). The meeting was a follow up meeting held on 30.04.2019 for finalizing Volume-II of the 19<sup>th</sup> Electric Power Survey for National Capital Region exclusively for PVVNL as in the said meeting, there were representations of only Ghaziabad and Gautam Budh Nagar district and the other six districts of PVVNL coming under NCR viz. Hapur, Bulandshar, Muzzafarnagar, Bagpat, Meerut, and Shamli remained unrepresented. The list of participants is enclosed as Annexure-I.

2. Welcoming the participants in the meeting, Chief Engineer (PS&LF) emphasized the importance of Electric Power Survey as the whole planning depends on the accurate forecasting that in turn depends on reliable past data/information & future plans. Deputy Director (PS&LF), then, briefed about the background of this exercise of demand projection and expressed concern over the delay in the submission of the data by the Discoms. He highlighted the inordinate delay occurring in finalizing the report and informed that this exercise was initiated in the year 2016 but requisite data/information could not be received from most of the Discoms till date.

3. Thereafter, a detailed discussion was held with respect to electricity data/information of each district of PVVNL. The gist of discussion held/decisions taken in the meeting are under:

- a) The guidelines/check list prepared by CEA for ensuring data consistency needs to be adhered with by the Discoms while furnishing the data. Any deviation needs to be appropriately explained.
- b) There were some confusion regarding the categories of the consumers for which data has to be submitted. It was informed that the definition of the categories of consumers for which data has to be submitted is already explained in the Volume –I of the Electric Power Survey and it would be shared with the participants. It was also suggested that the consumption not falling under the definition of Categories mentioned in the 19<sup>th</sup> EPS (Vol-I) may be indicated in the "Others Category". Also, electricity consumption in Open Access category will be given separately and to be included in a separate row under "Others Category".
- c) The comments for the inconsistencies in data/partial data of the 06 districts received so far were shared with the participants. The representatives were in

agreement with the comments and ensured for submitting the corrected data as soon as possible.

- d) It was observed that the input data for Shamli was provided from the year 2011-12. In this regard, the representative from Shamli clarified that Shamli was separated from Muzzfarnagar during that period. He also submitted that the complete data could be obtained by combining the data of the two divisions of Shamli and the same would be provided. With respect to other observation of reduction of 10% T&D losses in one particular year, it was clarified that due to feeder segregation, such drastic change in losses was observed.
- e) One of the issue common to Hapur and Bulandshar was the high growth in the consumption of Domestic and Commercial categories in 2014-15 and 2015-16. It was clarified that due to various government schemes, number of connections were increased and the supply hours have also increased.
- f) It was informed that the data for the districts has been furnished up to 2016-17 and it was agreed that actual data for the year 2017-18 and 2018-19 would also be submitted.
- g) Representatives from the districts were also requested to submit a small write up covering brief of the city, climate and rainfall in the city, policy Initiatives of Government affecting electricity demand economy, industrial or infrastructure development in the city, etc. for including the same in the final report.
- h) The data furnished by Discoms for 18<sup>th</sup> EPS is not matching with that of data for 19<sup>th</sup> EPS, Discoms are requested to check the same and reconcile the data as far as possible. If there were a gross difference, then Discom would provide the reasons for the same.

4. It was decided that all the nodal officers would ensure to submit the requisite information latest by 17<sup>th</sup> May 2019 and thereafter keeping some time gap for examining the submitted data/information and preparing comments thereon, it was decided that next meeting for resolving all the issues and taking up the matter further would be convened on 27<sup>th</sup> May 2019.

The meeting ended with vote of thanks to the Chair.
