NOTE:

- DISCOMs/ PDs (Power Departments) are suggested to get the Smart Meters installed through the AMISP (advance metering infrastructure service provider) for all Solar Roof Top systems in the areas where the Smart Metering works have already been awarded under RDSS.
- In case the Smart Metering works are yet to be awarded, the DISCOMs may prioritise Smart Meters to be installed as Net Meters so that, at a later stage, when AMISP is in place for the Smart meter works under RDSS these Smart Meters may be integrated with the Advanced Metering Infrastructure (AMI) established by the respective AMISP.

** - The list is as per information available on BIS website.

- The list is as per the data furnished by Meter Manufacturers to Central Electricity Authority (CEA) as on 01-04-2024.
