Advisory

विषय/Subject: - Advisory for compliance of the latest relevant standards - reg.

The instances have been brought to the cognisance of this office with regard to the standards IS/IEC/Others referred in various Regulations, Standards, Guidelines, brochures etc brought out by Central Electricity Authority (CEA) that some of the stakeholders continue to refer the older versions of the standards even when the revised/amended versions and/or amendments have been brought out by the Standardization Bodies. One of such instances is the case of relative leakage rate of different gases from any single compartment of GIS to atmosphere and between compartments. In this regard, the limits of (i) annual leakage rate during operation, and (ii) leakage rate for type test are to be adhered to as specified in the clause 6.16.3 of IEC 62271-203:2022 or its latest/ amended version.

All concerned are hereby advised that the latest versions of the relevant Standards including the latest amendments thereof have to be complied with though it is implied in the CEA documents that the 'latest Standards are to be followed' and is self-explanatory.

This issues with the approval of Member (Power Systems).

(सुरता राम)

मुख्य अभियन्ता (ET&I)

To: All procuring utilities/ organisations/ users in the power sector.
