Subject: - Requirement of fresh PTCC NOC/ clearance for modification/ diversion work of 400kV D/C Aurangabad Boisar & 400kV D/C Magarwada Boisar -regd .

PGCIL vide e-mail dated: 11.01.2024, 15.01.2024 and 16.01.2024 has requested to review the requirement of fresh PTCC NOC/ clearance in respect of diversion/ modification of existing 400kV D/C Aurangabad Boisar & 400kV D/C Magarwada Boisar Transmission line (both these lines are on Multi-circuit tower near Boisar end) to facilitate construction of Bullet train corridor by NHRCL in Boisar of Palghar District. For the said diversion work, existing one number tower (existing tower 198) is being replaced by three new Proposed towers (AP 1, AP 2, AP 3) and the maximum lateral deviation from the existing route is to the extent of 63 m

The received reference has been examined in light of the already issued PTCC approval for the said transmission line and it has been found that PTCC approval afresh is not required due to proposed diversion/ modification work of above mentioned line near Tower No. 198 .

This issues with the approval of Chief Engineer

Deputy Director

To,
Sr. DGM,
400 kV Navsari GIS,
PGCIL, Surat
