

Electrical Safety Workshop by CEI Division

Electrical accidents in the system do happen quite often. These include both fatal and non-fatal accidents. Keeping this in view, CEI Officers try to aware and educate the public and officers/staff of various utilities as much as they can by conducting routine seminars and Electrical Safety awareness programmes.

Each programme promises engaging session designed to impart practical insights and empower participants with the necessary skills to ensure their safety around electrical equipments with respect to CEA, Safety Regulations, 2023 and emphasizes on the practices need to be followed for safe usage of electricity which will ultimately help in minimizing Electrical Accidents.

“Electrical Safety Awareness Program in Jaisalmer, Rajasthan by Sh. Rahul Singh, Deputy Director, Chief Electrical Inspectorate Division, Central Electricity Authority (CEA)”

An **Electrical Safety Awareness Program** was conducted on **December 14, 2024**, at the **Collectorate, Jaisalmer, Rajasthan**. The program focused on providing an overview of the **Central Electricity Authority (Measures Relating to Safety and Electric Supply) Regulations, 2023**, also referred to as the **CEA Safety Regulations, 2023**.

It was attended by over **100 officers and staff** representing various solar developers and transmission utilities, including **PGCIL, NTPC, Adani Green, Ayaana Power** and others. Electrical Safety Handbook “**SACHET**”, an initiative of CEA jointly with BIS, ICAI and IEEMA was also presented to all the team leads of participating utilities.
