**FLY ASH GENERATION AT COAL / LIGNITE BASED THERMAL POWER  
STATIONS AND ITS UTILIZATION IN THE COUNTRY FOR THE 1<sup>ST</sup> HALF OF  
THE YEAR 2021-22 (APRIL 2021 TO SEPTEMBER 2021)**

**1.0 BACKGROUND**

Coal / Lignite based Thermal Power Generation has been the backbone of power capacity addition in the country. Indian coal is of low grade with ash content of the order of 24-63 % in comparison to imported coal which has low ash content of the order of 2-18 %. Large quantity of ash is, thus being generated at coal / lignite based Thermal Power Stations in the country, which not only requires large area of precious land for its disposal but is also one of the sources of pollution of both air and water.

Central Electricity Authority (CEA) has been monitoring since 1996-97 the fly ash generation and its utilization in the country at coal / lignite based Thermal Power Stations. Data on fly ash generation and utilization including modes of utilization is obtained from Thermal Power Stations on half yearly as well as yearly basis. The data thus obtained is analyzed and a report bringing out the status of fly ash generation and its utilization in the country is prepared. The said report is forwarded to the Ministry of Power, the Ministry of Science and Technology and the Ministry of Environment, Forests and Climate Change (MoEF & CC). It is also uploaded on the web site of CEA for bringing out the information in the public domain so that users of fly ash have access to the information on the availability of fly ash at different Thermal Power Stations (TPSs) in the country.

To reduce the requirement of land for disposal of fly ash in ash ponds and to address the problem of pollution caused by fly ash, Ministry of Environment, Forests and Climate Change has issued various Notifications on fly ash utilization, first Notification was issued on 14<sup>th</sup> September, 1999 which was subsequently amended in 2003, 2009 and 2016 vide Notifications dated 27<sup>th</sup> August, 2003, 3<sup>rd</sup> November, 2009 and 25<sup>th</sup> January, 2016 respectively.

Towards the efforts in the direction of enhancing gainful utilization of fly ash, the latest MoEF & CC's Notification of 25<sup>th</sup> January, 2016 stipulates mandatory uploading of details of fly ash available on TPSs' website and updating of stock position at least once in every month; increase in mandatory jurisdiction of area of application from 100 km to 300 km; cost of transportation of ash for road construction projects or for manufacturing of ash based products or use as soil conditioner in agricultural activity to be borne entirely by TPS up to 100 km and equally shared between user and TPP for more than 100 km and up to 300 km; cost of transportation of ash for road construction projects under Pradhan Mantri Gramin Sadak Yojna and asset creation programs of the Government involving construction of buildings, road, dam and embankment to be borne entirely by TPP within a radius of 300 Kms. and mandatory use of fly ash based products in all Government schemes or programs e.g.

Pradhan Mantri Gramin Sadak Yojana, Mahatma Gandhi National Rural Employment Guarantee Act, Swachh Bharat Abhiyan, etc.

The Notification of 3<sup>rd</sup> November, 2009 prescribes targets of Fly Ash utilization in a phased manner for all Coal / Lignite based Thermal Power Stations in the country so as to achieve 100% utilization of fly ash. The Thermal Power Stations in operation before the date of the Notification (i.e. 3<sup>rd</sup> November, 2009) are to achieve the target of fly ash utilization in successive 5 years - 50% in First year; 60% in Second year; 75% in Third year; 90% in Fourth year and 100% in Fifth year. The new Thermal Power Stations coming into operation after the MoEF & CC's notification (i.e. 3<sup>rd</sup> November, 2009) are to achieve the target of fly ash utilization as 50% in the First year, 70% in Second Year, 90% during Third Year and 100% during Fourth Year from their date of commissioning.

The report on fly ash generation and its utilization at coal / lignite based Thermal Power Stations provides the status of fly ash generation as well as utilization in the country. The report also contains conclusion and recommendation for increasing the present rate of utilization of the fly ash.

## 2.0 ASH GENERATION & UTILIZATION DURING THE 1<sup>ST</sup> HALF OF THE YEAR 2021-22

### 2.1 A Brief Summary :

Fly ash generation & utilization data for the 1<sup>st</sup> half of the Year 2021-22 (April 2021 to September 2021) has been received from 197 (**One Hundred Ninety Seven**) coal / lignite based Thermal Power Stations of various power utilities in the country.

Data thus received has been analyzed to derive conclusions on present status of fly ash generation and its utilization in the country as a whole. A brief summary of status is given in **Table-I** below:

TABLE - I

### SUMMARY OF FLY ASH GENERATION AND UTILIZATION

Description		1st Half of Year 2020-21	1st Half of Year 2021-22
No. of Thermal Power Stations from which data was received	:	<b>199</b>	<b>197</b>

Coal consumed (Million tonnes)	:	<b>312.99</b>	<b>376.22</b>
Fly Ash Generation (Million tonnes)	:	<b>106.37</b>	<b>133.90</b>
Fly Ash Utilization (Million tons)	:	<b>84.22</b>	<b>109.32</b>
Percentage Utilization of Fly Ash (%)	:	<b>79.18</b>	<b>81.65</b>
Percentage Average Ash Content (%)	:	<b>33.98</b>	<b>35.59</b>

Power Station wise fly ash generation & its utilization status including modes of utilization for the 1<sup>st</sup> half of the Year 2021-22 for all the thermal power stations is given in the statement at **Annexure-I**.

## **2.2 Power Utility-wise Status of Fly Ash Generation & its Utilization during the 1<sup>st</sup> Half of the Year 2021-22**

The status of fly ash generation & utilization for the 1<sup>st</sup> half of the year 2021-22 for various power utilities in the country has been assessed based on data received from Thermal Power Stations and the same is given in **Table-II** :

**TABLE - II**

### **2.3 State wise Status of Fly Ash Generation & its Utilization during the 1<sup>st</sup> half of the Year 2021-22**

The state wise status of fly ash generation & utilization in the country based on data received from Thermal Power Stations / Power Utilities has also been assessed and the same is given in **Table-IV** :

**TABLE-IV**

**STATE WISE FLY ASH GENERATION AND ITS UTILIZATION DURING THE  
1<sup>ST</sup> HALF OF THE YEAR 2021-22**

It may be seen from **Table-IV** above that:

- (i) **Six (6)** states namely Chhattisgarh, Madhya Pradesh, Maharashtra, Odisha, Uttar Pradesh and West Bengal each have generated more than 10 million-ton of fly ash during the 1<sup>st</sup> half of the Year 2021-22. Maximum fly ash of more than **20** million-ton was generated in Chhattisgarh during the aforesaid period.
- (ii) During the 1<sup>st</sup> half of the Year 2021-22, Out of **17** states, Gujarat, Haryana, Maharashtra, Punjab, Rajasthan and Tamil Nadu have achieved the fly ash

utilization level of more than 100% with Haryana reporting highest **239.43 %** fly ash utilization.

### **3.0 PRESENT STATUS OF FLY ASH UTILIZATION AS PER MoEF & CC's NOTIFICATION OF 3<sup>rd</sup> NOVEMBER, 2009**

Fly ash generation and utilization data received from Thermal Power Stations / Power Utilities in the country for the 1<sup>st</sup> half of the year 2021-22 has been compiled to see the fly ash utilization vis-à-vis the target of fly ash utilization as prescribed in MoEF & CC's notification of 3<sup>rd</sup> November, 2009.

During the 1<sup>st</sup> half of the Year 2021-22, all those thermal power stations which were in operation on the date of issuance of MoEF & CC's notification (i.e. 3<sup>rd</sup> November, 2009) should have achieved the target of fly ash utilization of 100% within five years from the date of notification. All those thermal power stations which have come into operation after the date of issuance of MoEF & CC's notification (i.e. 3<sup>rd</sup> November, 2009) should have achieved the target of fly ash utilization of 100% within four years depending upon their date of commissioning. However, it is seen that the target set by MoEF & CC's notification has not been achieved by most of the Thermal Power Stations.

#### **3.1 Range of Fly Ash Utilization during the 1<sup>st</sup> Half of the Year 2021-22**

Based on the fly ash utilization data received from Thermal Power Stations / Power Utilities, the Thermal Power Stations have been grouped into five categories as noted below depending upon range of utilization of fly ash by the stations.

**TABLE – V**

#### **POWER STATION WISE RANGE OF PERCENTAGE FLY ASH UTILIZATION**

**3.2 Thermal Power Stations that have achieved Fly Ash utilization level of 100% or more during the 1<sup>st</sup> half of the Year 2021-22**

The following Thermal Power Stations, as given in **Table – VI**, have achieved the fly ash utilization level of 100% or more during the 1<sup>st</sup> half of the year 2021-22.

It may be seen from **Table - VI** above that:

During the 1<sup>st</sup> half of the Year 2021-22, **71** Thermal Power Stations have achieved the fly ash utilization level of 100 % or more, out of which **43** Thermal Power Stations have achieved fly ash utilization level of more than 100 %.

Fly ash utilization level of more than 100 % indicates full utilization of fly ash generated during the period of report along with that from ash pond.

### **3.3 Thermal Power Stations with Fly Ash Utilization Level of 90% to less than 100% during the 1<sup>st</sup> half of the Year 2021-22**

The names of Thermal Power Stations which have achieved the fly ash utilization in the range of 90% to less than 100% during the 1<sup>st</sup> half year 2021-22 along with fly ash utilization level achieved by each of these power stations are given in **Table - VII** below:

#### **4.0 MODES OF FLY ASH UTILIZATION DURING THE 1<sup>st</sup> HALF OF THE YEAR 2021-22**

The data on fly ash utilization received from Thermal Power Stations / Power Utilities for the 1<sup>st</sup> half of the year 2021-22 has been compiled to ascertain the modes in which fly ash was utilized and the quantity utilized in each mode.

The modes in which fly ash were utilized during the 1<sup>st</sup> half year 2021-22 along with utilization in each mode are given in **Table – XII** :

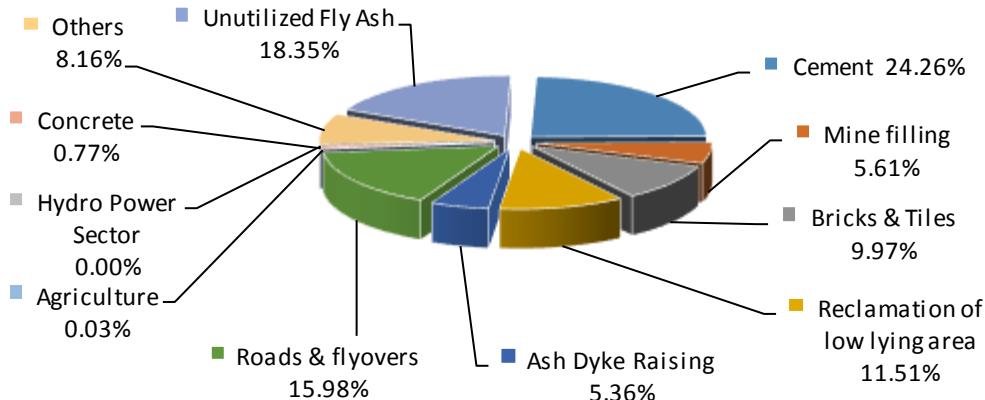

**TABLE – XII**

**MODES OF FLY ASH UTILIZATION DURING THE 1<sup>st</sup> HALF OF THE YEAR 2021-22**

The PIE diagram showing the modes of utilization of fly ash during the 1<sup>st</sup> half of the Year 2021-22 is given in Figure-1 below:

## Major Modes of Fly Ash Utilization during 1<sup>st</sup> Half of the Year 2021 - 22

**Figure - 1**

It may be seen from **Table - XII** and **Figure -1** above that:

During the 1<sup>st</sup> half of the Year 2021-22, the maximum utilization of fly ash to the extent of 24.26 % of total fly ash utilized was in the Cement sector, followed by 15.98 % in Roads & flyovers, 11.51% in Reclamation of low laying area, 9.97 % in Bricks & Tiles, 5.61 % in Mine Filling, 5.36 % in Ash Dyke Raising, 0.77 % in concrete, 0.03 % in Agriculture, 8.16 % in others and 18.35 % Fly Ash remain Unutilized.

## 5.0 CONCLUSIONS & RECOMMENDATIONS

1. The Half Yearly Fly Ash Utilisation (in %) for the last few years is as shown below :

Year	Fly Ash Utilization (in % Percentage)
2014-2015	53.01
2015-2016	56.04
2016-2017	57.93
2017-2018	60.38
2018-2019	68.72
2019-2020	78.19
2020-2021	79.18
2021-2022	81.65

2. The utilization of fly ash is in the range of 1 to 24 % in making fly ash based Building Products, in Mine filling it is less than 6 %, in the Construction of Roads & Flyovers it is around 16 %. These areas have large potential of fly ash utilization which needs to be explored for increasing the overall utilization of fly ash in the country.
3. A Web page has been developed for Fly Ash Generation & its Utilization and Mobile App 'ASH TRACK' has been launched by Ministry of Power as an interface between TPS and potential users.
4. A few strategies which need to be adopted to further increase the utilization level of fly ash are given below:
  - Renovation and modernization of coal / lignite based Thermal Power Station needs to include the technological advancement required to ensure development of dry fly ash collection, storage and disposal facilities so that fly ash in dry form could be made available to its users. Renovation and modernization should also include a marketing strategy for the development of fly ash based industries and making available fly ash and fly ash based building products in the nearby markets.

- The states and districts where Thermal Power Stations are located need to be sensitized to the need for utilization of fly ash and fly ash based building products and take necessary measures to promote them in the construction of buildings, highways / roads / flyovers and other infrastructure projects. Measures can include policy intervention, planning strategies, fiscal incentives, recognizing specific efforts etc.
- Use of fly ash based building products like fly ash based bricks, blocks, tiles etc. by both Govt. and Public & Private Construction agencies at Central and State levels is required to be ensured especially in construction works within a radius of 300 km of any coal / lignite based Thermal Power Station as mandated in MoEF & CC's Notification of 25th January, 2016. The government agencies responsible for approval of building plans may have to ensure stipulation of a condition in their approval to the effect that only fly ash based building products like bricks / blocks / tiles etc. shall be used in the construction of buildings as prescribed in MoEF & CC's Notification of 25th January, 2016 within a prescribed distance from any Thermal Power Station especially in the construction of large office / commercial buildings and housing projects being developed both in government and private sectors.
- Use of fly ash in the construction of roads, road embankments and flyovers is well established and is slowly picking up. However, its potential is yet to be fully utilized. The use of fly ash in these projects within a radius of 300 km of any Thermal Power Station as mandated in MoEF & CC's Notification of 25th January, 2016 has to be ensured right from project formulation stage and included in tender documents by having a prior tie up with the concerned Thermal Power Station for their requirement. There is a need to sensitize National Highway Authority of India, CPWD, State PWDs and other agencies both at Central and State levels that are involved in the construction of highways, roads, flyovers etc. in this regard.

- Use of fly ash in backfilling / stowing of closed / abandoned / running open cast and underground mines has large potential for utilization of fly ash, especially for pit head Thermal Power Stations which otherwise have limited avenues for fly ash utilization. However, its potential is yet to be fully utilized. The use of fly ash in back filling/stowing of open cast and underground mines within a radius of 50 km of any Thermal Power Station as mandated in MoEF & CC's Notification of 3rd November, 2009 has to be ensured right from initial stage of preparation of mine development plan. Inclusion of fly ash and bottom ash as backfill materials in the guidelines for preparation of mine closure plan is required for which Ministry of Coal and other concerned Ministries / Authorities have to take necessary action. There are environmental and safety concerns for use of fly ash along with overburden (OB) material for back filling of operating open cast mines. These concerns need to be addressed.
- Use of fly ash in the construction of embankments for laying railway lines has also significant potential for large scale utilization of fly ash. There are safety concerns in use of fly ash in the construction of railway embankments having passenger traffic. There is a need to address these concerns by carrying out necessary studies by organizations like Railway Design & Standards Organization (RDSO), a research organization under the Ministry of Railways.
- Thermal Power Stations may ensure the utilization of fly ash and fly ash based building products within the Thermal Power Station for the development of infrastructure like construction of buildings & roads, reclamation of low lying areas, the raising of ash dyke etc.
- The use of fly ash in Agriculture and waste land development has large potential but the utilization is below expectation. This may be attributed mainly to reservations in various quarters for use of fly ash in agriculture because of presence of heavy metals and radioactive elements in fly ash however, findings of research projects funded by Fly Ash Unit under Ministry of Science & Technology and studies carried out by other organizations indicate that there are no adverse effects in using fly ash in agriculture.

Therefore, these concerns are required to be addressed for increasing the fly ash utilization.

- Thermal Power Stations may explore and promote all possible modes of fly ash utilization at their respective Thermal Power Station for increasing the fly ash utilization in the country in line with MoEF & CC's notifications of 3rd November, 2009 and 25th January 2016.
- There is a need to encourage 'Industry–Institute Interactions' for entrepreneur development, creating awareness and organizing training programmes and workshops.
- New emerging areas such as Light Weight Aggregates and Geo-polymers, Coal Beneficiation- Blending and Washing, etc. needs to focus for higher utilization of fly ash in the country.
- In view of large quantity of fly ash generation, utilization of fly ash may be introduced as construction material in academic curriculum of Engineering, Architecture, Mining, Agriculture etc.
