**FLY ASH GENERATION AT COAL / LIGNITE BASED THERMAL POWER STATIONS AND ITS UTILIZATION IN THE COUNTRY FOR THE 1<sup>ST</sup> HALF OF THE YEAR 2022-23 (PERIOD: APRIL 2022 TO SEPTEMBER 2022)**

**1.0 BACKGROUND**

Coal / Lignite based Thermal Power Generation has been the backbone of Power Capacity Addition in the Country. Indian Coal is of Low Grade with Ash Content of the order of 24 - 63 % in comparison to Imported Coal which has Low Ash Content of the order of 3-20 %. Large Quantity of Ash is, thus being generated at Coal / Lignite based Thermal Power Stations in the Country, which not only requires Large Area of precious Land for its disposal but is also one of the sources of Pollution of both Air and Water.

Central Electricity Authority (CEA) has been monitoring since 1996-97 the Ash Generation and its Utilization in the Country at Coal / Lignite based Thermal Power Stations. Data on ash Generation and Utilization including Modes of Utilization is obtained from Thermal Power Stations on Half Yearly as well as Yearly Basis. The Data thus obtained is analyzed and a Report bringing out the Status of Ash Generation and its Utilization in the Country is prepared. The said report is forwarded to the Ministry of Power, the Ministry of Science and Technology and the Ministry of Environment, Forests and Climate Change (MoEF & CC). It is also uploaded on the web site of CEA for bringing out the information in the Public Domain so that Users of Ash have access to the information on the availability of Ash at various Thermal Power Stations (TPSs) in the Country.

**1.1 LATEST MOEF & CC NOTIFICATION ON UTILIZATION OF FLY ASH :**

To reduce the requirement of Land for Disposal of Ash in Ash ponds and to address the problem of Pollution caused by ash, Ministry of Environment, Forests and Climate Change has issued various Notifications on ash utilization. First Notification was issued on 14<sup>th</sup> September, 1999 which was subsequently amended in 2003, 2009 and 2016 vide Notifications dated 27<sup>th</sup> August, 2003, 3<sup>rd</sup> November, 2009 and 25<sup>th</sup> January, 2016 respectively. In 2021 MoEF & CC issued a new Notification dated 31.12.2021 suppressing

all the previous Notifications. Also, on 30.12.2022 an amendment Notification has also been issued by MoEF & CC.

The main provisions regarding Fly Ash Utilization in the MoEF & CC Notification dated 31<sup>st</sup> December, 2021 and its First Amendment dated 30<sup>th</sup> December, 2022 are as follows:

**Para A: Responsibilities of thermal power plants to dispose fly ash & bottom ash:**

- Every Coal or Lignite based thermal power plant (including captive or co-generating stations or both ) shall be primarily responsible to ensure 100 per cent utilization of (fly ash, and bottom ash) generated by it in an eco-friendly manner.
- The ash generated from coal or lignite based thermal power plants shall be utilized only for the following eco-friendly purposes, namely:
  - Fly ash based products viz bricks, tiles, fibre cement sheets, pipes, boards, panels;
  - Cement manufacturing, ready mix concrete;
  - Construction of road and fly over embankment, Ash and Geo-polymer based construction material;
  - Construction of dam;
  - Filling up of low lying area;
  - Manufacturing of sintered or cold bonded ash aggregate;
  - Agriculture in a controlled manner based on soil testing;
  - Construction of shoreline protection structures in coastal districts
  - Export of ash to other countries;
  - Any other eco-friendly purpose as notified from time to time.
- Every coal or lignite based thermal power plant shall be responsible to utilise 100 per cent ash (fly ash and Bottom ash) generated during that year, however, in no case shall utilisation fall below 80 per cent in any Year, and the thermal power plant shall achieve average ash utilisation of 100 per cent in a three years cycle:

Provided that the three years cycle applicable for the first time is extendable by one year for the thermal power plants where ash utilisation is in the range of 60-80 per cent, and two years where ash utilisation is below 60 per cent and for the purpose of calculation of percentage of ash utilisation, the Percentage quantity of utilisation in the year 2021-2022 shall be taken into account as per the table below:

Utilisation percentages of thermal Power plants	First compliance Cycle to meet 100 percent utilisation	Second compliance cycle onwards, to meet 100 percent utilisation
>80 per cent	3 years	3 years
60-80 per cent	4 years	3 years
<60 per cent	5 years	3 years

Provided further that the minimum utilisation percentage of 80 per cent shall not be applicable to the first year and first two years of the first compliance cycle for the thermal power plants under the utilization category of 60-80 per cent and <60 per cent, respectively.

Provided also that 20 percent of ash generated in the final year of compliance cycle may be carried forward to the next cycle which shall be utilised in the next three years cycle along with the ash generated during that cycle.

Provided also that new thermal power plants commissioned on or after the date of publication of this notification shall follow the first compliance cycle similar to the compliance cycle specified for thermal power plants having utilization less than 60 percent as specified in the table.

- The unutilised accumulated ash i.e. legacy ash, which is stored before 1<sup>st</sup> April, 2022 shall be utilised progressively by the thermal power plants in such a manner that the utilization of legacy ash shall be completed fully within ten years from the 1<sup>st</sup> April, 2022 and this will be over and above the utilisation targets prescribed for ash generation through current operations of that particular year :

Provided that the minimum quantity of legacy ash in percentages as mentioned below shall be utilised during the corresponding year and the minimum quantity of legacy

ash is to be calculated based on the annual ash generation as per installed capacity of thermal power plant.

Year from date of publication	1st	2nd	3rd -10th
Utilisation of legacy ash (in percentage of Annual ash)	At least 20 per cent	At least 35 per cent	At least 50 per cent

Provided further that the legacy ash utilisation shall not be required where ash pond or dyke has stabilised and the reclamation has taken place with greenbelt or plantation or solar power plant or wind power plant as per the guidelines issued by the Central Pollution Control Board (CPCB) as specified sub-para A-(6) Notification. Stabilization and reclamation of an ash pond or dyke including certification by State Pollution Control Board (SPCB) or Pollution Control Committee (PCC) shall be carried out within Three Years from 1<sup>st</sup> April, 2022. The ash remaining in all other ash ponds or dykes shall be utilised in progressive manner as per the above mentioned timelines.

- Provided that ash stored in all ash ponds or dykes other than operational ash pond or dyke designated for temporary storage of ash as specified in the sub para (6) shall constitute the Legacy ash and either to be reclaimed or stabilized or utilized.
- Every coal or lignite based thermal power plant (including captive or co-generating stations or both) shall provide real time data on daily basis of availability of ash with Thermal Power Plant (TPP), by providing link to Central Pollution Control Board's web portal or mobile phone App for the benefit of actual user(s).

Provided that it is delivered at the project site free of cost and transportation cost is borne by such coal or lignite based thermal power plants.

Provided further that thermal power plant may charge for ash cost and transportation as per mutually agreed terms, in case thermal power plant is able to dispose the ash through other means and those agencies makes a request for it and the provisions of ash free of cost and free transportation shall be applicable, if thermal power plant serves a notice on the construction agency for the same.

**Para C: Environmental compensation for non-compliance**

- In the first two years of a three years cycle, if the coal or lignite based thermal power plant (including captive or co-generating stations or both) has not achieved at least 80 per cent ash (fly ash and bottom ash) utilisation, then such non-compliant thermal power plants shall be imposed with an environmental Compensation of Rs. 1000 per ton on unutilised ash during the end of financial year based on the annual reports submitted and if it is unable to utilise 100 per cent of ash in the third year of the three years cycle, it shall be liable to pay an environmental compensation of Rs. 1000 per ton on the unutilised quantity on which environmental compensation has not been imposed earlier:

Provided that the environmental compensation shall be estimated and imposed at the end of last year of the First compliance cycle as per the various utilisation categories as mentioned in sub-paragraph (4) of Para A.

It may be seen from **Table - IV** above that:

- (i) 5 states namely Chhattisgarh, Madhya Pradesh, Maharashtra, Uttar Pradesh and West Bengal each have generated more than 10 million-tonnes of fly ash during the

1<sup>st</sup> half of the Year 2022-23. Maximum fly ash of more than **20** million-ton was generated in Chhattisgarh during the aforesaid period.

- (ii) During the 1<sup>st</sup> half of the Year 2022-23, Out of **17** states, Andhra Pradesh, Bihar Gujarat, Haryana, Jharkhand, Tami Nadu and West Bengal have achieved the fly ash utilization level of more than 100% with Gujarat reporting highest **146.38** % fly ash utilization.

### **3.0 PRESENT STATUS OF FLY ASH UTILIZATION AS PER MoEF & CC's NOTIFICATION OF 31<sup>st</sup> DECEMBER, 2021 FOR THE 1<sup>st</sup> HALF OF THE YEAR 2022-23**

Fly ash generation and utilization data received from Thermal Power Stations / Power Utilities in the country for the 1<sup>st</sup> half of the year 2022-23 has been compiled to see the fly ash utilization vis-à-vis the target of fly ash utilization as prescribed in MoEF & CC's notification of 31<sup>st</sup> December, 2021. Para A (4) of the Notification stipulates the conditions regarding the utilization of fly ash. The present status is as shown in Table-V below:

**Table-V**

**Present Status for the 1st Half of the Year 2022 - 23**

Category	Utilization percentages of TPPs ( Base year 1 <sup>st</sup> Half of the Year 2021-22 )	No. of TPPs (Base Year – 1 <sup>st</sup> Half Year of 2021-22)	No. TPPs during 1 <sup>st</sup> Half of 2022-23	
			Target achieved (100%)	Target not yet achieved ( Less than 100% )
I	> 80%	100	58	42

III	< 60%	36	1	35
IV	Data Not Available	3	2	1
	<b>Grand Total</b>	<b>175</b>	<b>68</b>	<b>107</b>

From the above table, it may be seen that out of **175** TPPs, **68** TPPs i.e. about **39%** have achieved the target of 100%. It may be noted the 1<sup>st</sup> Compliance Cycle has started from 1<sup>st</sup> April, 2022. So those TPPs which are in Category I, II and III have 3, 4 and 5 years to achieve the target of 100% as per the provisions of Notification.

## 5.0 CONCLUSIONS & RECOMMENDATIONS :

1. The Half Yearly Fly Ash Utilisation (in %) for the last **Three** years is as shown below :

Year	Fly Ash Utilization (in Percentage)
<b>2020-2021</b>	<b>79.18</b>
<b>2021-2022</b>	<b>81.65</b>
<b>2022-2023</b>	<b>78.14</b>

2. The utilization of fly ash is in the range of 1 to 26 % in making fly ash based Building Products, in Mine filling it is less than 7 %, in the Construction of Roads & Flyovers it is around 21 %. These areas have large potential of fly ash utilization which needs to be explored for increasing the overall utilization of fly ash in the country.
3. A Web Portal has been developed for Fly Ash Generation & its Utilization and Mobile App 'ASH TRACK' has been launched by Ministry of Power as an interface between TPSs and Potential users.
4. A few strategies which need to be adopted to further increase the utilization level of fly ash are given below:
  - Renovation and modernization of coal / lignite based Thermal Power Station needs to include the technological advancement required to ensure development of dry fly ash collection, storage and disposal facilities so that fly ash in dry form could be made available to its users. Renovation and modernization should also include a marketing strategy for the development of fly ash based industries and making available fly ash and fly ash based building products in the nearby markets.
  - The states and districts where Thermal Power Stations are located need to be sensitized to the need for utilization of fly ash and fly ash based building products and take necessary measures to promote them in the construction of buildings, highways / roads / flyovers and other infrastructure projects. Measures can

include policy intervention, planning strategies, fiscal incentives, recognizing specific efforts etc.

- Use of fly ash based building products like fly ash based bricks, blocks, tiles etc. by both Govt. and Public & Private Construction agencies at Central and State levels is required to be ensured especially in construction works within a radius of 300 km of any coal / lignite based Thermal Power Station as mandated in MoEF & CC's Notification of 31<sup>st</sup> December, 2021. The government agencies responsible for approval of building plans may have to ensure stipulation of a condition in their approval to the effect that only fly ash based building products like bricks / blocks / tiles etc. shall be used in the construction of buildings as prescribed in MoEF & CC's Notification of 31<sup>st</sup> December, 2021 within a prescribed distance from any Thermal Power Station especially in the construction of large office / commercial buildings and housing projects being developed both in government and private sectors.
- Use of fly ash in the construction of roads, road embankments and flyovers is well established and is slowly picking up. However, its potential is yet to be fully utilized. The use of fly ash in these projects within a radius of 300 km of any Thermal Power Station as mandated in MoEF & CC's Notification of 31<sup>st</sup> December, 2021 has to be ensured right from project formulation stage and included in tender documents by having a prior tie up with the concerned Thermal Power Station for their requirement. There is a need to sensitize National Highway Authority of India, CPWD, State PWDs and other agencies both at Central and State levels that are involved in the construction of highways, roads, flyovers etc. in this regard.
- Use of fly ash in backfilling / stowing of closed / abandoned / running open cast and underground mines has large potential for utilization of fly ash, especially for pit head Thermal Power Stations which otherwise have limited avenues for fly ash utilization. However, its potential is yet to be fully utilized. The use of fly ash in back filling/stowing of open cast and underground mines by Thermal Power Station as mandated in the MoEF & CC's Notification of 31<sup>st</sup> December, 2021 has

to be ensured right from initial stage of preparation of mine development plan. Inclusion of fly ash and bottom ash as backfill materials in the guidelines for preparation of mine closure plan is required for which Ministry of Coal and other concerned Ministries / Authorities have to take necessary action. There are environmental and safety concerns for use of fly ash along with overburden (OB) material for back filling of operating open cast mines. These concerns need to be addressed.

- Use of fly ash in the construction of embankments for laying railway lines has also significant potential for large scale utilization of fly ash. There are safety concerns in use of fly ash in the construction of railway embankments having passenger traffic. There is a need to address these concerns by carrying out necessary studies by organizations like Railway Design & Standards Organization (RDSO), a research organization under the Ministry of Railways.
- Thermal Power Stations may ensure the utilization of fly ash and fly ash based building products within the Thermal Power Station for the development of infrastructure like construction of buildings & roads, reclamation of low lying areas etc.
- The use of fly ash in Agriculture and waste land development has large potential but the utilization is below expectation. This may be attributed mainly to reservations in various quarters for use of fly ash in agriculture because of presence of heavy metals and radioactive elements in fly ash however, findings of research projects funded by Fly Ash Unit under Ministry of Science & Technology and studies carried out by other organizations indicate that there are no adverse effects in using fly ash in agriculture. Therefore, these concerns are required to be addressed for increasing the fly ash utilization.
- Thermal Power Stations may explore and promote all possible modes of fly ash utilization at their respective Thermal Power Station for increasing the fly ash utilization in the country in line with MoEF & CC's notifications of 31<sup>st</sup> December, 2021 and its amendment dated 30<sup>th</sup> December 2022.

- There is a need to encourage 'Industry–Institute Interactions' for entrepreneur development, creating awareness and organizing training programmes and workshops.
- New emerging areas such as Light Weight Aggregates and Geo-polymers, Coal Beneficiation- Blending and Washing, etc. needs to focus for higher utilization of fly ash in the country.
- In view of large quantity of fly ash generation, utilization of fly ash may be introduced as construction material in academic curriculum of Engineering, Architecture, Mining, Agriculture etc.
